PROGRAM DESCRIPTION

#1 2 3 A+ Score! (A+Score!), believes that all students can learn when given instruction that is personalized to their performance levels and is presented in an engaging and motivating way. Together with teachers and parents we can significantly increase the literacy rates of our nation. Our K-12, research-based, academic program is designed to maximize student learning through explicit instruction, and individualized instruction that is differentiated to meet the needs of each student learner.

Students enrolled in the A+Score program are tutored in their own homes, according to their personal schedules using our innovative award winning software, laptop and internet provided. Instruction is based on the immediate needs facing each student as diagnosed in the initial assessment and subsequent screens. Our software will engage, empower and motivate students towards grade level proficiency. There is communication with classroom teachers to make sure each student is receiving the maximum benefits from their tutoring time. This kind of student-centered instruction guarantees the most progress that each student is capable of making considering where they start and their own abilities.

English Language learners, special education students, and those students far below grade level are welcomed. Our tutoring approach respects the individual learning style of each student. A+Score! firmly believes that at the completion of each prescribed tutoring program using our computer assisted instruction the students will:

- experience success and progress in order to become confident in their mathematical and/or reading ability.
- develop processes of inquiry, discovery, generalizing, and reasoning which can be used in all areas of life.
- use a wide variety of methods and strategies, including technology, to solve and/or research problems.
- learn to recognize the value of the various roles of math and reading in society.

Register today to place your child on the road to educational success!

PROGRAM DESCRIPTION

1 to 1 Tutor provides a high quality, research-based online program proven to increase students' math skills. Using Study Island, we tutor students in K through 12th grade in Math. During tutoring, students interact with tutors on a 1:1 ratio via computer communications in "real time." Students communicate with tutors through a headset with microphone and on the cyber whiteboard, provided without charge by our company. Tutoring takes place in students' homes and is offered Monday-Friday before and/or after school until 9:00 pm and on weekends.

PROGRAM DESCRIPTION

Tutoring is done on the online platform. For those students who do not have a laptop or access to the Internet we provide them with the same free of cost to attend the program.

The salient features of our tutoring program include one to one instruction, live tutoring, use of state aligned curriculum, flexibility, high quality researched material, experienced tutors, convenient, continuous monitoring of student's progress and involvement of teachers and parents at each step of the student's development. Classes are conducted 2 to 3 times a week with each class being of 60 to 90 minutes duration.

Our virtual classroom has a whiteboard which has a set of teaching tools to teach students synchronously over the Internet. It is used to promote communication, collaboration and understanding among students.

We conduct pre assessment tests for each of our student to gauge the topics they need help with and also post assessment tests to measure the effectiveness of our program.

We use PLATO® eduTest to assess the student's strengths and weaknesses and develop Student Learning Plans and a focused timetable.

The parents are provided with progress reports on a bi-weekly basis. Our program has served more than 1000 students in the past year.

The typical profiles of the students we tutor each year are those who belong to low-income group. We have extensive experience working with such students and also have expert tutors who use their skills to teach IEP students effectively.

PROGRAM DESCRIPTION

Golden Eye Reading Enhancement Program

Our Literacy Program address Washington's Essential Academic Learning requirements by increasing the literacy rate among youth and to end academic and spiritual disengagement of students. Of all black youth fourth graders in the nation 56% are functionally illiterate. We are the cornerstone of what the organization brings to the community by guiding youth in many life experiences, fostering a positive self-perception and self-respect; encouraging excellence in education, and the pursuit of positive life-long goals.

Education programs deliver support services, which help youth achieve their educational goals. Current education programs include: "Real Men Read", "LIFT", and "Leadership/ Life Skills".

Health & Wellness is a vital component of a thriving community. The 100 teams up with other non-profit organizations to promote preventative health strategies, deliver screenings, and provide education on prevalent African American diseases. (Prayer, Partners in Prevention, Exercise, HIV/AIDS Awareness, Eat Right)

Economic Development programs focus on these primary areas: Financial Literacy, Family Wealth Building, Entrepreneurship, Investing In The Church, Financial Fitness For Life, and Basic Financial Life Skills.

The Golden Eye Reading Program is designed to facilitate cognitive recognition using eye and brain coordination through slightly highlighted words of the reading text in an effort to broaden vocabulary and to stimulate memorization of words. During reading sessions we also notate unrecognized words by students so that we can sponsor those words in sentences, poetry, and essays. Golden Eye's components consist of what we call the Triple R's (Read, Review, Retain). We make reading an enjoyable learning experience while simultaneously modifying and enhancing the concept of understanding what is read, articulating the reading material, and putting newly learned words into action. Our reading program focuses on elementary, middle school and high school students.

How students benefit:

Students see mentor modeling and the importance of reading

All students see positive role models who value education Students listen to a fluent reader and follow along,

PROGRAM DESCRIPTION

We provide students with the interactive web-based software Compass Learning Odyssey (CLO) from CompassLearning.com. Odyssey's curriculum is aligned to the Washington's Academic Learning Standards and Requirements. We provide laptop and internet connection free of cost to every student.

The highlight of our program for children who are performing significantly below grade level is that the students can work at their own pace, listening to directions as many times as they require. We also execute summer programs to enable such students recover skills and credit while progressing at their own pace.

The instructional approach behind designing the software is direct instruction and scaffolded learning. Students are not introduced to higher concepts until they master the basic fundamentals of a concept. Media rich content and flash based activities help keep the learner engaged while grasping important concepts. The program is based on credited and widely accepted scientific research and follows the recommendations of the National Reading Panel and National Council of Teachers of Mathematics.

We offer tutor intervention to help the student understand the concepts and clarify doubts. We hire tutors who have had previous experience in working with ELL students and students with disabilities. We have bilingual tutors that can tutor in both Spanish and English.

Since the program is offered online, no transportation is required and our services can be availed of by the student in the comfort of his or her home. Each student is provided a user name and password to access our program 24 x7. Our bi-weekly progress reporting and weekly phone-based communication with parents/guardians, school and district staff helps keep them updated on their child's progress.

CLO can provide assistive support to develop reading, speaking, listening, and vocabulary skills in ten languages: Spanish, Vietnamese, Haitian/Creole, Hmong, Mandarin, Russian, Arabic, Korean, Japanese, and Portuguese.

PROGRAM DESCRIPTION

Our program has been specially designed in accordance with the latest Academic Learning Requirements of Washington. It promotes the foundational knowledge students need to succeed in today's world. Our program design includes carefully constructed and sequenced lesson plans, individualized direct one to one instruction, thematic education and problem based learning for students in grade K to grade 12 in English Reading and Math. Our program has the advantages of a self-paced program supported by full interaction and focused attention of experienced teachers. Our lessons are conducted online at the student's home under the supervision of parents/guardians. The Program provides tutoring on all the 7 days of the week between 3 PM to 10 PM during weekdays, and 10 AM to 10 PM during weekends, as per the convenience of the students. The length of each tutoring sessions will be 1 hour. The students can have a minimum of 2 sessions, and maximum 4 sessions in a week.

We provide 24X7 technical support for any technology related issue. For those students, who do not have computer & Internet connection, we provide the same free of cost.

Our instructional program is set to cater to individual student's needs through an exclusive Learning Plan developed after an initial assessment and contributions made by teachers and parents. Parent feedback is collected at each step and the student's progress is monitored and reported to parents and teachers after every 12 hours of sessions. Our students have been able to score exceptionally well in classroom as well as state exams. We are able to serve children with special needs, English language learners as well as low income and low performing students.

PROGRAM DESCRIPTION

Your child will improve in Math or Reading with College Tutors. We provide one-on-one tutoring with a trained tutor. Imagine having the same dedicated tutor working directly with your child in sessions created specifically for your child's ability. A caring tutor who is excited to help your child understand will surely improve grades and confidence. A parent using College Tutors says, "The tutor has established an excellent working relationship...she has identified the weaknesses and strengths... she has made the maximum efforts to improve reading comprehension. As the parents of the kids, we have recognized their significant improvement."

We provide tutoring in your home, at school, or a library. Sessions are either after school, in the evening, or on a weekend, at a time convenient for your family. Sessions are 60 to 90 minutes in length, twice weekly. Your child will work with the same tutor, fostering a positive relationship while improving skills. Students look forward to sessions since the time is focused directly on them!

College Tutors makes learning fun by using exciting tools (cards, dice, puzzles, games, special storybooks, etc). College Tutors does not require additional technology and provides all materials. Our sessions provide a live tutor (no online or computer programs) and each session is direct one-on-one teaching to your child. How do we do this? Student information is gathered from parents and school regarding specific learning needs. A brief assessment at the first session helps, too. College Tutors combines this information and develops a Learning Plan. Then we prepare a customized program for reading and/or mathematics to match the need and assist your child in achieving school success. Research proves individualized connections mean improved grades. College Tutors provides feedback after each session so your family knows just what the student is working on and can celebrate success.

PROGRAM DESCRIPTION

A Dream Zone tutoring offers tutorial services to K-12 students in Reading/Lang. Arts and Mathematics as well as a strong emphasis in mentoring and guidance. We believe that a small student to teacher ratio benefits the students and allows them to flourish in confidence and academics. We expect our students to achieve a minimum of a 2-4 grade level increase in the subject of tutoring. If your child does not reach his/her goal by the end of the 30 hours, NO WORRIES! ADZ will continue to provide services until goal is achieved. We have middle to high school assistant tutors who excel in school and mentor as well. Our unique curriculum is designed to meet the needs of our diverse learners. We have designed activities, developmentally appropriate lessons, and a variety of games to ensure that children will enjoy learning and will strive to succeed. Developing a strong educational foundation is crucial for our children and is why A Dream Zone strives to reach each child's full potential while gaining the self confidence, in which exudes from amazing guidance and learning. While forming partnerships with parents, teachers, staff, and the community, the child will be able to obtain all the great benefits of Title 1 SES. We believe in working together with our community and putting the child first. A Dream Zone is excited to explore new discoveries with our children while experiencing a variety of educational and just plain FUN field trips. We also believe in assisting our families with advocating for their children and are able to assist with referral and community services.

Districts: Auburn School District #408, Kent School District

PROGRAM DESCRIPTION

A Learning Solution's level one program contains ten sessions. Session objectives are based on Washington State English Language Development Standards beginning to advance beginning skills in listening, speaking, reading, and writing. The reading literacy skills are based on best-practices for instruction and tied to the Washington State K-12 Reading Model with a focus on the "Big Five" – phonemic awareness, phonics, fluency, vocabulary, and comprehension. Parents participating in the sessions will receive take home materials to use with their child. Take home resources will include: literature, hands-on manipulatives, games and songs. Parents who attend eight out of the ten sessions will receive a certificate of completion.

A level two six week program gives learners opportunities for situational role plays and additional vocabulary experience through class study of ordinary daily situations such as shopping, Doctor office visit, school processes and others. Focus in this more advanced program continues development of word parts and knowledge, listening comprehension, early literacy skills, phonemic awareness, phonics, and fluency. The reading literacy skills are based on best-practices for instruction and tied to the Washington State K-12 Reading Model. Take home resources include: literature, practice exercises, games, songs and hands-on study materials. Students who attend five of the six sessions and complete the home study materials receive a certificate of completion.

PROGRAM DESCRIPTION

A+ Learning Solutions has been providing reading/language arts instruction to students --including English language learners- in kindergarten through 12th grade at no cost to parents under the No Child Left Behind program since 2005. Our program is committed to improving your child's grades and test scores. Our mission is to provide instruction tailored to your child's individual needs and proficiency level in alignment with state standards. Highly qualified tutors provide face-to-face instruction and stay with the student throughout the entire session. Instruction may be one-on-one or in a very small group format. On average our sessions are 60 to 90 minutes long twice per week. We are flexible in the duration of each tutoring session to accommodate student needs or school needs. Our program is taught at the child's school usually right after school whenever possible. Tutoring may also take place at the child's home or alternative public locations jointly agreed between all parties at times meeting the needs of the families: weekends, holidays, summer. Any location and time all parties jointly select is an option for tutoring. Tutors are available to report progress to parents following each session. Give your child the benefit of high quality tutorial services. Give your child A+ Learning Solutions!

PROGRAM DESCRIPTION

A+ Private Tutoring is a locally owned tutoring service that provides tutoring to K-8 students in reading, writing, mathematics and study skills. Our tutors are skilled certified teachers who have 10 years of experience providing high quality instruction to our students. Our SES services offer one-on-one and small group tutoring focusing on individualized instruction to meet the learning needs of each and every student. Our tutoring locations are both safe and convenient for students/parents.

We are committed to finding improvement and success for all our students. Each and every student is important to us. Our tutoring program designs individual learning plans for each student to meet his/her learning goals. These goals are grade-level specific and matched to Washington State Essential Academic Learning Standards and Grade Level Expectations. Our proven results are backed by research based instructional strategies which we use to provide a hands-on, engaging tutoring experience for all our students.

Our SES tutoring service offers the following to our students and their families:

- Communication with parents, teachers and schools about student needs
- Weekly student progress reports
- One-on-one and small group tutoring
- Bilingual tutoring for students and parent support in Spanish
- ELL tutoring is available
- Caring, dedicated professional educators
- Laptops and computerized supplemental curriculum
- References available

Please contact us if you have any questions regarding our tutoring services or the SES tutoring program. Or visit our website at www.aplusprivatetutoring.com for more information.

A+ Tutors For Scholars

PROGRAM DESCRIPTION

A+ Tutors For Scholars offers a digital learning program that is backed by scientific-based research and consists of the following characteristics: 1) Places students into the appropriate level of their mastered academic skills. 2) Individualizes instruction for each child. 3) Tracks academic competence. 4) Provides progress of individual performance and skills not mastered. 5) Correlates to Washington State Standards. These major elements are achieved through the use of a low student-to-instructor ratios and computer-based instructional assessments to ensure individualized instruction for grades K-12. With tutoring sessions designed to provide students with computer-based instruction and assessment, the results show average student grade-level gains across both academic subjects (Reading and Mathematics) at an approximate rate of .205 for every 8 hours spent in the program.

Using only highly qualified staff, A+ Tutors For Scholars will provide high-quality supplemental services to Washington schools and communities. A+ Tutors For Scholars is dedicated to providing quality services to all students, including those with disabilities, limited English language skills and students at-risk. A+ Tutors For Scholars is proud to be serving students in Hawai'i and Alabama and looks forward to providing services to qualified students in Washington.

SuccessMaker™ and NovaNet™ deliver content through a highly engaging interface that makes math and reading instruction, practice and assessment fun. The programs are highly interactive, addressing multiple learning modalities and making students active participants in their learning and the game-like formats of many activities are challenging and motivating so learners can't wait to use the program. Even the best curriculum falls flat if your learners aren't interested in using it. SuccessMaker™ and NovaNet™ were built on research around what motivates learners at each age. Students from kindergarten through twelfth grade LOVE using the programs and, most importantly, can't wait to learn more.

PROGRAM DESCRIPTION

Abacus In-Home Tutoring, Inc. delivers the individualized instruction students need to meet their academic goals in reading and mathematics. Abacus specializes in working with all students in Kindergarten through twelfth grade, including those with disabilities and English language learners. For our in-home program, tutors travel directly to the student's home at times convenient to families. For our small group program (no more than 5 students per instructor), tutorial sessions are provided directly after school hours at safe and convenient public locations that are easily accessible by public transportation.

Abacus uses an individualized teaching model, emphasizing one-on-one attention and customized lessons. Abacus instructors are certified teachers or degreed professionals with a minimum of 60 college credit hours. All instructors must successfully pass all required background and reference checks, and must undergo mandatory initial and ongoing training to ensure a high quality program.

Abacus utilizes pre and post-assessments from Pearson Education including the KTEA II, the GRADE/GMADE and the R/MLI. Once the student has been assessed, Abacus staff meet with parents/guardians and school district staff to incorporate student test data, IEP and/or 504 plans (where applicable), learning styles and preferences. An individualized student learning plan (SLP) is then created for each student with goals that are aligned to the Washington EALRs. Abacus uses Pearson curriculum materials, all of which are aligned with the Washington EALRs in both reading and mathematics, as well as the National Reading Panel and the National Council of Teachers of Mathematics.

Parents, teachers and school district staff receive written progress reports each month outlining the student's progress toward the goals from the SLP. Progress reports are available in English and Spanish but Abacus will make every effort to accommodate speakers of all languages. Students who complete the Abacus program show an average of a year's worth of growth!

PROGRAM DESCRIPTION

K12 Support Center (K12 SC) is a King County based nonprofit organization dedicated to the academic achievements of K-12 students with special emphasis on low performing East African students. K12 SC works primarily in the adjustment of new comers to Greater Seattle area schooling system. It aims to build a healthy community by providing extra learning time and opportunity for K-12 students and parent school connections. For the last five years K12 SC has been contributing to the academic enhancement of East African communities in Puget Sound Region, specifically in Southeast and Southwest Seattle, Tukwila, SeaTac, and Kent neighborhoods.

K12 SC Programs: K12 SC is a part of big institution that runs different teaching programs that focus exclusively on supporting the holistic family and communal adjustment in to the new world they came. In terms of SES provision we provide tutoring core academic subject areas such as math, reading, and writing in different seasons that include:

- Regular After School Program
- Abu-Bakr Academy that supports over 75 students and their parents on daily basis
- Summer School (an intensive course for eight weeks)
- Week end cultural and social classes for children and parents

K12 SC's SES program targets on improving the academic performance of SES eligible students: by providing academic support activities that are aligned with the Washington State's Standards to meet the academic requirements of elementary, middle, and high school students. Upon enrollment K12 SC administers pre-test that identifies student's skill level; with the help of parent we will then set up an individualized learning plan for the students. There will be continuous reviews on how students are responding to the intervention and parents will be updated accordingly.

Academia.net will improve your student's performance through online tutoring over the Internet, in the safe environment of your home or your child's school. We have been fortunate to successfully tutor over 950 kids in Washington since 2003. Academia.net provides tutoring in Math and Language Arts, including reading and writing, for grades K-12. Our computer-based services offer a high level of flexibility, where students choose their own schedule, and complete a total of 30-40 one-hour online sessions.

Academia.net uses a comprehensive evaluation to identify each student's strength and growth areas, and then tailors the lessons and instruction to meet their individual needs. Based on the student's initial assessment results, we create a customized curriculum to help your student improve their Math and Language Arts skills. Students get to work at their own pace, and move on to new levels of skill mastery by demonstrating at least 70% accuracy on each lesson assessment.

We provide the following for each type of program:

AT-HOME

- A LAPTOP computer and Internet connection
- An in-home visit by our local representative to help with connecting to the Internet, instruction for completing the program successfully, and support for any questions you may have

PROGRAM DESCRIPTION

Every child can learn to read! Thousands of students around the world have learned to read with Academic Associates Reading Program. Reading skills using phonics are taught step-by-step so that students gradually and gently develop complete reading proficiency. The program is scientifically designed to cooperate with the whole brain by streamlining the flow of data, which simplifies and accelerates the process of learning to read. All students are taught by a Reading Instruction Specialist, individually or in small groups, in a safe, nurturing environment. After just 30 to 60 hours most students are reading at grade level or higher.

We have impressive success in math instruction as well. Students are able to work on the concepts they are currently learning at school. They improve their grades without losing momentum! With no pressure, blame or embarrassment, instructors help them understand homework and insure that it is completed correctly. Students can prep for tests, review material already learned, and work ahead. No wonder our students enjoy coming to our center!

PROGRAM DESCRIPTION

Every Student Can Learn to Read!™ Thousands of students around the world have learned to read with the Academic Associates Reading Program. Reading skills using phonics are taught step-by-step so that students gradually and gently develop complete reading proficiency. The program is scientifically designed to cooperate with the whole brain by streamlining the flow of data, which simplifies and accelerates the process of learning to read. All students are taught by a Reading Instruction Specialist, individually or in a small group, in a safe, nurturing environment. In just 30 to 60 hours, most students are reading at grade level or higher, and usually they have gained 2-4 years in ability! Students learn to read and succeed in other areas as well. Even students with dyslexia, AD/HD, and other learning challenges find success in our program.

We have impressive success in math instruction as well. Students are able to work on the concepts they are currently learning at school. They improve their grades without losing momentum! With no pressure, blame or embarrassment, instructors help them understand the material, assist them in processing the instructions on their homework, and insure that it is completed correctly. Students can prep for tests, review material already learned, and work ahead. No wonder our students enjoy coming to our center!

Best of all, we are WA state certified teachers based in Wenatchee. We are able to provide your student with quality classes right in our center, so we don't have to rent out space from the school. Simply put, that means we can give your student more hours of tutoring than out-of-town agencies can provide.

Let us help your child succeed! For more information on our worldwide program, visit our website at www.Academic-Associates.com.

PROGRAM DESCRIPTION

At A.C.E.S. (Academic Coaching & Educational Services) we believe the State's Essential Academic Learning Requirements (EALRs) provides guidelines of grade level skills learners need to be successful in school. We provide services on Saturday mornings or after school. Our Saturday program provides three or more hours of small group or individualized instruction. Our after-school program includes two sessions weekly for one and one-half hours each day. We use school district curriculum-based assessments, leveled reading books, and sample State assessment (Measure of Student Progress) questions and curriculum to support learners in performing more confidently in class on daily task and assessments.

As professional educators with many years of experience in schools, we believe each child to be unique and use strategies that will help each child become aware of his /her learning capacity. Students with special needs are integrated in our small groups. We provide interpreters for parent conferences in Spanish, Vietnamese, Amharic, and other languages as needed.

Our Site Directors meet with each child and family at the beginning of the program to identify learning goals and to develop Student Learning Plans. Plans are developed using school testing, individual assessments, and parent/teacher input. The Directors work closely with teachers/coaches, maintains student records, and provides updates to the parents and classroom teachers.

Instruction is focused on math and reading with frequent in-class assessments. In reading, students practice phonics, reading fluency, vocabulary, and comprehension. In math, the focus is on basic facts, computation, and problem solving skills. Writing is included in math and reading.

This is a ten-week intensive program. We expect to have students attend regularly in order to see big changes in their interest in learning, ability to take responsibility for their learning, and to gain a renewed sense of joy for learning. Parents are always welcomed to observe instruction.

PROGRAM DESCRIPTION

ACADEMIC FITNESS CENTER is a state approved supplemental educational support provider and a mobile supplemental educational support services company that designs individual educational support programs for pre-K through adults. We have provided supplemental educational support for more than 15 years. One-to-one and small group sessions (up to four students per group) are available. Target areas for each program are selected from the following: math, phonics, reading, spelling, grammar, writing, vocabulary development, homework help, and college prep.

Three programs are offered: Conditioning, for students who are struggling and need knowledge gaps filled; Strengthening, for students who want to build confidence in a target area(s) or need help maintaining their achievement level(s); and Toning, for students who want an edge in a target area(s). Our custom programs build students' motivation, confidence, and academic achievement.

Diagnostic assessments are given to each student to measure the student's skill sets in order to help identify areas of strengths and weaknesses. Information from assessments is used to design each student's personal educational support program. We also meet with the student and parent(s)/guardians(s) (for students under age 18) to gain information that assessments are unable to provide.

Programs can be adjusted to continually meet the needs of each student. Curriculum, games, activities, and handouts used in each support program align with district, state, and national standards. Our qualified and professional academic coaches join a student's learning style and skill sets with scientifically based research to help each student reach her/his educational support program goal.

PROGRAM DESCRIPTION

ACADEMIC LINK OUTREACH

ONE-ON-ONE TUTORING = ACADEMIC SUCCESS

Nothing feels as good as academic success! Academic Link Outreach (ALO) is a non-profit organization, helping students meet and exceed state standards, graduate from high school, and be better prepared for college or the work force. Jan Link, Director, was a teacher, curriculum director, elementary and secondary principal. Her passion is helping students achieve success in school so that they may enjoy success in life.

To accomplish this, ALO offers one-on-one skill focused tutoring to individual students or small groups when requested. We give instruction to students in grades K-12 in reading, mathematics and writing. We focus our instruction on the skills essential for classroom learning to provide greater understanding. The key to increased academic achievement is increased motivation, quality instruction, and time on task.

In reading, we teach word recognition, vocabulary, reading comprehension and reading fluency. In math, we teach the Washington State Essential Academic Learning Requirements, reinforce what the student is learning in the classroom, strengthen skills not mastered, and prepare students for new skills that they will need. In writing, we reinforce math and reading through paragraph and essay writing.

We use materials that complement classroom learning and the state testing expectations so that students will have the competence and confidence to be successful. Communication with the classroom teacher helps coordinate our program with what is taught in the classroom. We teach and reinforce organizational and study skills needed for school success. Motivation is a key component to our program.

Instruction is provided after school and on weekends, at the student's home, the student's school, a community center, or public library. Our tutors come to you so that transportation is not an issue. Convenient times and locations are arranged with each parent. Academic success is our goal!

PROGRAM DESCRIPTION

Our mission at Academic Success Tutoring, is to see each individual student reach his or her highest potential by providing a positive and enriching environment, and to instill a love of learning. We believe that all students can learn when instruction is personalized to their learning style.

We offer tutoring for students from K through Grade 12 and above. The same tutor works one on one with your child, which provides a safe learning environment for your child to ask questions and be free of fear of judgments or peer pressure. This also allows the tutor to focus in on your child and provide maximum support, which also means progress at a higher rate compared to multiple students per tutor. Most of the students we tutor achieve great success in a short time and usually get ahead while feeling very grounded in the subject. We have bilingual tutors as well who speak Spanish and English.

Our program, at Academic Success, is assessment based and highly individualized. We maintain an ongoing communication with the teachers and parents.

Our goal is to address the gaps and also help your child experience success in his current assignments, and if possible, to get ahead. In addition to the school district's curriculum, we incorporate different resources to maximize your child's success. We use hands on materials to help your child get grounded in the concepts.

In our reading program we also focus on comprehension, vocabulary building and some writing to enhance their comprehension. In math, time tests in addition, subtraction, multiplication and division are administered to increase computational skills; we also practice for MSP and HSPE Tests.

Our tutoring service is offered at our Tutoring Center in Lynnwood/Mukilteo or at your child's school during after school hours and on Saturdays. Visit our website www.ACADEMICSUCCESSINC.com

PROGRAM DESCRIPTION

Our math program uses a well-researched and highly respected instructional technique that encourages students to think for themselves along with a curriculum that has received the highest marks for improving student achievement in all three subjects requested in this application.

Our Language Arts program focuses on writing as that is the best way to learn not only writing but also comprehension. Students write on our whiteboards and respond to questions from the instructor. These questions guide them in the proper use of grammar, syntax and composition.

PROGRAM DESCRIPTION

ACE Tutoring Services, Inc. offers one-on-one and small group tutoring in English-language arts and mathematics to students from kindergarten through 12th grade. Our services are provided at student's home or local library throughout the state of Washington. Tutoring sessions take place at the student's home, library or community center. Students choose their own convenient tutoring schedule. Tutoring sessions are available 7 days a week. Students can learn at his/her own pace and receive instructions that focus on his/her specific weaknesses in English language arts and math. All of our tutors have at least a bachelor's degree, and many have Washington teaching certificates and/or advanced degrees. Bilingual tutors are also available. Our program strictly follows Washington's Essential Academic Learning Requirements (EALRs). ACE Tutoring Services, Inc. has been providing tutoring services since 1997, and has been an approved Supplemental Educational Services (SES) provider in the state of Washington since 2007.

Our instructions and materials are organized according to each student's unique academic needs, and are based on each district's instructional program, and complement the instructions that each student receives from his/her own school. Our reading program stresses the importance of developing phonemic awareness, vocabulary and reading comprehension skills, so the student can understand and use different skills to read various texts or materials, and understand what he/she reads. Our math program focuses on developing number sense and mathematical reasoning, mastering mathematical procedures, and understand/apply concepts to solve problems.

PROGRAM DESCRIPTION

We have been a successful on line SES provider for mathematics in 16 states for over 4 years, and have received over 400 testimonials from parents praising us for the improvement in math performance their students have received.

Aligned to the state mathematics curriculum, our program reinforces classroom learning and helps students retain what is taught in a 1:1 tutor: student ratio. Students go online for 3-4 one hour sessions per week. Since we are online there are not the usual time and transportation barriers found with traditional tutoring. Students work from their home whenever it is convenient for them via the internet using the laptop that we provide for program use. Regardless of a district's Per Pupil Allocation (PPA), we will provide a minimum of 30 hours of tutoring to students with no additional cost to parents or school districts. If agreed to by the school district, we will allow students to have unlimited access to our learning platform even after the funding has been spent. Students can tutor until the end of the school year at no cost to parents/school district.

The process starts with students taking a curriculum-based assessment at their grade level to identify their strengths and challenges. Based on the results of the assessment, an Individual Learning Plan is created specifically for that student. Students using our platform experience an average 15 point increase in pre and post-testing. 83% of our students reported that their math grades went up in school. In our home state of Georgia, 67% of students passed/exceed the state math test with us, 15% higher than the average SES tutor. Several students have gone from getting D's and F's in math to getting B's and A's. The success of our students is a testimony to the effectiveness of our platform.

PROGRAM DESCRIPTION

Achievement Matters, Inc. is the leading provider of one-on-one tutoring for students in Kindergarten through 12th grade. We tutor students in all subjects including Math and Reading and serve a broad range of students including minority, migrant, Special Education, and English language learners. Tutoring is available at your location of choice including the student's home, local community centers, public libraries, or school sites. Tutoring services are held around the student's and parent's schedule and sessions can be arranged 7 days a week, including early morning, after school, evening, and weekend sessions. We hire the best and most qualified tutors around including multilingual instructors who can provide tutoring sessions in the student's native language if need be.

Our tutoring program is customized to fit the student's individual needs so that we can offer the most effective instruction possible. After the instructors at Achievement Matters assess your child's learning needs, they will create a customized lesson plan to help your child achieve academic success. These lesson plans will target the specific areas where improvement is needed. Our qualified and caring tutors will work one-on-one with your son/daughter to make sure he/she is on track as planned. At the end of every session, your child's tutor will provide feedback and update you on his/her progress. We will also email/send monthly progress reports and feedback forms to you and your child's teacher to ensure that your child is advancing academic standards.

At Achievement Matters, we believe that education should be a right, not a privilege and are here to support your child's academic success. Our experienced team of educators feel that it is important to develop a healthy partnership to ensure that your child receives the individualized attention he/she deserves. Through our services, we can help your child achieve his/her academic goals!

PROGRAM DESCRIPTION

Achievement Resources LLC is an after school program that serves students from 1st grade to 10th grade in reading and mathematics. This program provides tutoring services to enhance classroom performance, grades, and results on state mandated tests. Particular students and group populations consist of low income, minority and migrants. The program concentrates on the distinctive needs of each individual student as suggested by Title 1 by supplementing the learning of the student in danger of not meeting the states' educational standards and by serving disadvantaged students to meet state criterion. This program partners with families and schools to use schools and libraries to provide these services in a convenient time and place for parents. We evaluate the students' progress during each session through progress reports. We share the reports with the parents on a bi-weekly basis by either meeting with the parents or sending the reports to them physically or electronically.

Achievement resources LLC offers mentoring sessions to our students as well. Every now and again students and their families need someone to open up to about day to day issues which may come about and impact academic performance. Our approach and self esteem enrichment provide students and their families with opportunities to recognize problems and possible solutions. As a team effort, we take the essential steps to assure a meaningful connection between students, teachers, and families.

PROGRAM DESCRIPTION

Advance Tutoring Services (formerly Advantage Tutoring Center) offers an exciting, research-based, multi-modal learning program.

Each student works with their assigned tutor and uses computer based learning systems, workbooks and hands on materials. Each student gets an individualized learning program to fit his or her needs and learning style. We help students who are struggling in reading and/or math topics, ELL students, those with learning disabilities such as dyslexia, as well as average to above average learners. We use visual, auditory, and kinesthetic methods to take all learning styles into account.

Advance Tutoring Services feels that building self-esteem is KEY and we employ professional, kind, and caring instructors to work with our students. Our reading programs address each of the essential reading components -- phonemic awareness, phonics, fluency, comprehension, and vocabulary. Our math programs address the basic computational skills that students need prior to moving onto higher-level math topics. We also address math concepts, skills, and strategies that build on critical thinking, algebraic thinking, and problem-solving components.

A student may access tutoring services in the following ways:

- Students get tutoring at their school with qualified tutors from Advance Tutoring Services. Tutoring is usually right after school.
- Students get tutoring at a local library or church or other facility with qualified tutors from Advance Tutoring Services.
- Students may do a distance home study plan if they do not have access to the program in their school or other local facility or if they live in a remote area that makes it not feasible to get the tutoring any other way. Student will be assigned a distance tutor and supervised by Advance Tutoring Services.
- Students may come to our center if they live in Whatcom County.

All programs, tutors, and instruction are monitored closely by Advance Tutoring Services. For more information: call -360-312-3495 or go to www.ATlearn.com

PROGRAM DESCRIPTION

ACEDONE focuses on providing age and culturally appropriate support for children to insure they stayed in school and did not create a new cycle of difficulties by dropping out. In order to do this, ACEDONE identified physical space and created programming which provided families with children a safe and positive place to receive tutoring and individual mentoring.

Our after school program, starts with a pre-test aligned with Washington state standard. Once we find out the strands that need improvements we design a remedial class instructions based on content area. Our instructors use web based math and English programs. The programs we use are Study island and IXL . We monitor monthly areas that students mastered and the areas that students need improvements. At the end of program we take post test and interpret the progress of the students.

PROGRAM DESCRIPTION

ALPHA provides supplemental instruction in math, reading, writing and studying skills. We target both remedial and accelerated learners with an innovative online program. The overall objective of ALPHA is to be a key provider of supplemental education in the community. ALPHA provides online instruction in language arts and math for students in grades 1 –6. All instruction is monitored by a live, qualified tutor with experience working with English Learners and Students with Special Needs. Program Design: Students log on to tutoring sessions two (2) days per week, 2 hours each day for five (5) weeks, totaling twenty (20) tutoring hours for one entire session. ALPHA provides tutoring services to students as they enroll throughout the year, including the summer. Students receive instruction in either math or language arts. Curriculum and Materials: ALPHA uses only curriculum and materials created and published by Curriculum Associates, a global leader in educational materials that continues to develop products. ALPHA uses i-Ready Diagnostic Math and Language Arts software/DOMA Basic Math Skills online intervention software, which is standards-aligned educational material created and published by Curriculum Associates. Use of this software ensures that all instruction, curriculum and supporting materials are research-based and of high quality, as all materials have been aligned with applicable Washington-adopted content standards, K-12 curriculum frameworks and instructional materials. All materials address skills that will continue to increase students' academic achievement in English-language arts and math. All areas of language arts and math are addressed in the I-Ready/DOMA software, including: word analysis, fluency, systematic vocabulary development, reading comprehension, literary response and analysis, writing strategies and applications, and written language conventions, as well as number concepts, mixed operations, estimations, measurement, algebra, geometry and problem solving. Each user license contains practice for state tests, including proficiency tests.

PROGRAM DESCRIPTION

Alternatives Unlimited, Inc. (AU) is a national educational company that provides web-based and small group tutoring in reading/language arts and mathematics for students K-12. AU will assist school districts in Washington by offering purposeful, focused instruction to help students achieve specific targeted goals aligned to Washington's reading and math standards, as well as the individual district instructional program. Workbooks, graphic organizers, and student activities support the instruction during the tutoring session. This allows students the opportunity for peer group interaction, as well as, individualized support, focus, and instruction. AU Tutoring incorporates Evans Newton Inc. (ENI) curriculum, iTarget Teach Fundamentals, as the basis for our student success focusing on quality, standards-based instruction with immediate assessment data to drive remediation. The optimal AU tutoring session will last two hours per day and take place two days per week. AU does understand, however, that a two hour session may prove too grueling for the younger learners; therefore, AU is prepared to modify delivery with shorter sessions that meet more often during the week. AU is also prepared to offer Saturday services, if necessary. AU tutoring leads to better report cards and greater success on state tests. Tutoring activities reinforce the instruction in your child's classrooms for better understanding. The AU program will help your child succeed now and in the future!

PROGRAM DESCRIPTION

We have been helping struggling students overcome learning barriers and improve in school achievement for 39 years. Our tutors use a powerful teaching method that handles the three main reasons students do not learn. The program produces students who can read fluently and with comprehension, do math problems with understanding, and who not only pass tests, but have learned how to overcome study barriers and be less dependant on teacher help. At the beginning and periodically throughout, students are tested to pinpoint their academic weaknesses and to mark their progress toward greater ability. As they work individually and in small groups, learning gaps that prevent them from succeeding in school are repaired through activities that engage the senses - modeling in clay, demonstrating ideas with objects, using new words and practicing skills.

Snacks and all instructional materials are provided. Each month the tutor sends a progress report to the parent and a parent-tutor meeting can be held on a weekday evening or Saturday when needed. We tutor after school, on weekends and in the summer. We will tutor at the student's home, community centers or libraries.

PROGRAM DESCRIPTION

Success through Education!!! At Arriba Education, (AE), we want to engage young people in a variety of learning activities in order to awaken an interest in the world around them and help them imagine their place in it. AE believes that all students can learn when given instruction that is personalized to their performance levels and is presented in an engaging and motivating way. We believe that together with teachers and parents we can close the gap between the nation that reads and the nation that doesn't.

Students enrolled in the AE program are tutored in their own homes, libraries, community centers or school sites according to their personal schedules. Parent input is sought and respected. Tutors regularly bring parents into the learning process and appreciate their insight. AE tutors are encouraged to report to parents their students' progress during each visit.

Instruction is based on the immediate needs facing each student as diagnosed in the initial assessment and subsequent screens. Our tutors engage, empower and motivate students towards grade level proficiency. There is communication with classroom teachers to make sure each student is receiving the maximum benefits from their tutoring time. This kind of student-centered instruction guarantees the most progress that each student is capable of making considering their own abilities.

AE welcomes students who are English Language learners, special education students, and those students far below grade level. Our teachers are bilingual and selected to reflect the cultural diversity of the students we serve.

Every tutor providing tutoring:

- Must be fingerprinted by a private Live scan operator, or through their school district of employment.
- Must have a negative chest x-ray or TB test result.
- Are regularly evaluated to ensure quality instruction.

PROGRAM DESCRIPTION

ATS Project Success offers eligible K-12 students support in English language arts/reading and mathematics. We offer services online in the comfort and safety of the student's home with a pre programmed laptop computer and dial-up Internet service at no cost. Students in grades K-8 and those that perform below the ninth grade instructional level will use the SuccessMaker® curriculum and students in grades 9-12 and those that perform above an eighth grade instructional level will use the Odyssey curriculum.

The family home must have an analog telephone, existing Internet service in the home, or be in a T-Mobile or Verizon cellular area.

Since July 2003, we have provided SES to over 30,000 students in over 500 school districts in 32 states.

Tutors monitor student progress online and work with schools and classroom teachers to ensure student efforts in the program are helping them succeed in their regular classroom.

Students are assessed to determine their instructional level and learning objectives. Next, the curriculum is adjusted and set to provide activities at the appropriate level. Students are encouraged to complete two one-hour sessions per week.

Staff monitors student progress online and follows-up with e-mails/calls to the student and calls to their parents once each week. These telephone calls are conducted in Spanish or Hmong, if requested. Monthly written reports are sent to parents (English/Spanish/Hmong).

From 2006 through 2010, data was gathered from parents about how their K-8 students in our program progressed in their regular classrooms. Our most recent survey (2009-10) results show that 99% (740) of the parents are satisfied with the quality of the services they received from ATS Project Success, 88% (657) felt that their children's attitude toward school improved, and 90% saw an improvement in their children's grades.

PROGRAM DESCRIPTION

Program Description: Avail Learning offers reading and math tutoring to students in Kindergarten through 12th grade, on-site at students' schools, community center or at an Avail Learning center. Tutoring takes place after school and/or on weekends. We have tutored several hundred students during the past seven years and more than 75% percent of them have shown improvement in our program. At the program's start, we test all students to determine skill level. During the program, we use nationally recognized learning materials that are aligned with Washington's Essential Academic Learning Requirements - the same standards followed in all Washington schools. Avail Learning offers small group(maximum 3-4 students per teacher) tutoring. Parents/Guardians choose the program that best suits their child's needs. Our trained tutors provide hands-on, in-person tutoring using research-based materials. Tutors are able to break down math and reading concepts to allow students to better grasp them. From there, tutors help students master knowledge of these skills and concepts. Our qualified tutors are highly trained in the Avail Learning educational management system and are experienced at working with students from diverse backgrounds to maximize learning. With a collaborative effort between our staff/tutors, schools/districts, and parent/guardians, we provide the best learning environment to ensure student success.

PROGRAM DESCRIPTION

Avalon utilizes trained bilingual tutors, online educational tools and small group instruction to benefit students who are in need of academic support. Avalon's tutors are able to translate lessons into student's native language, ensuring that information is understood. Students who receive dual language instruction are often better able to grasp phonetic concepts and develop reading skills.

In addition to bilingual instruction, Avalon uses computerized educational tools along with print materials. This will allow Avalon to address the learning strengths and styles of each student. Variety in approaches ensures that students have the opportunity to review concepts in a manner that suits their learning style.

With small group instruction Avalon is able to maximize resources and personnel while still meeting the needs of academically struggling students. Trained tutors work with a group of no more than five students. Students are grouped based on the results of their pre-assessments, placed in a small group with others who need additional instruction in the same areas.

Babbage Net School

PROGRAM DESCRIPTION

Babbage Net School leverages the power of a personal computer paired with a self-paced individualized tutoring program to provide the highest quality tutoring available. In addition to an individualized curriculum loaded onto a laptop computer, each student is supported by tutors accredited by the National Tutoring Association (NTA) and our Help Hotline. Our customized tutoring program allows Babbage Net School to cater to the individual educational needs of each student.

After enrollment, student skill and comprehension is assessed using the Pearson Vue Basic Achievement Skills Inventory (BASI). Based on the results of the BASI assessment, as well as input from parents and teachers, an individualized curriculum tailored to the student's needs is created from our library of lessons. The curriculum is then loaded onto a laptop and delivered to students. The computer is locked to only allow students access to the tutoring software. All necessary technology is included with the program, and no internet connection is required. Students move through lessons at their own pace, being assessed at the end of each lesson to monitor progress. Regular progress reports outlining student achievement towards goals are sent to families on a monthly basis. Additionally, parents can view their student's progress in real time by accessing the home screen of the tutoring program on the student's laptop computer, which lists the lessons completed by the student, the student's mastery score for each lesson, and the amount of time the student spent on each lesson. At the close of the program, students take a post-assessment to show overall improvement through the Babbage program.

PROGRAM DESCRIPTION

Better Grades In-Home Tutoring offers professional one-on-one tutoring from a certified teacher or academic specialist in the comfort of your home or at your child's school. We provide highly qualified tutors for any subject, for any grade K-12, and for any ability level. Our mission is to help all students achieve academic success.

We work with all learning disabilities and processing disorders. Better Grades is an approved Supplemental Educational Services (SES) Provider in all Clark County school districts, and we work with other non-profits to provide free tutoring to low-income families. From elementary math, reading, and state testing prep to high school Calculus, Chemistry, and SAT/ACT Prep, we have the right tutor for you.

Better Grades is a local agency and was founded by Washington state-certified teachers. We are familiar with the schools of this community, and we know the curriculum. Many of our tutors also teach in the local school districts we serve. We are committed to the communities of Clark County, and we proudly serve the Greater Clark County area. Our tutors work with your child's school curriculum and communicate with classroom teachers. Help your child get on track to academic success by choosing Better Grades In-Home Tutoring as your SES provider.

PROGRAM DESCRIPTION

Boys & Girls Clubs provides supplemental educational services for youth at our Clubs in the following geographic areas: Anacortes, Arlington, Auburn, Bainbridge Island, Bellevue, Bellingham, Blaine, Edmonds, Everett, Federal Way, Ferndale, Lake Stevens, Lummi Island, Lynden, Lynnwood, Marysville, Mercer Island, Monroe, Mount Vernon, Mukilteo, Oak Harbor, Redmond, Kirkland, Seattle, Skyway, Snohomish, Sultan, Tulalip, and White Center. These Club locations are affiliated with the following central organizations: Boys & Girls Clubs of Whatcom County (www.whatcomclubs.org), Skagit County (www.bgcskagit.org), Snohomish County (www.bgcsc.org), King County (www.positiveplace.org), and Bellevue (www.bgcbellevue.org). For more information click on their website links.

The Boys & Girls Clubs uses Project Learn, a research based, nationally tested, educational philosophy to provide supplemental educational services to Washington's highest risk youth. Project Learn, the education strategy of Boys & Girls Clubs of America, consists of five components: 1) Homework help and tutoring; 2) High-yield learning activities; 3) Recognition; 4) Parent involvement; and 5) Collaboration with schools. Project Learn activities support what students learn in school—directly, through homework help/tutoring, and indirectly, through games and activities that build reading and math skills. Club staff work with parents to create academic goals for their children and provide regular updates on their progress, through reports or in-person conferences. Clubs are open in the evenings, to encourage parent involvement and accommodate work schedules. The annual Boys & Girls Club membership fee, ranges from \$1-\$30, entitles youth to after school homework help and tutoring, recreation activities, leadership development programs, technology training, and arts programs. No child is turned away for inability to pay; we offer many scholarships.

Districts: Seattle, Bellevue, Northshore, Redmond, Issaquah

PROGRAM DESCRIPTION

Best in Class Education Centers are institutions specialized in tutoring Mathematics and English for both enrichment and remedial purposes. Opened in Washington in 1995, BC Education Center is committed to strengthening students' analytical and reasoning skills through our tailor-made teaching materials and professional guidance.

With a view to help students to study most effectively, we took the lead since our foundation to adopt computers as a teaching tool. The colorful graphics and diagrams displayed on computers facilitate students to grasp various concepts readily while turning the traditional learning process into a lively exploration of the knowledge world. The computers also presents students with questions so that students can practice what they have just learned without delay.

The exercises are carefully formulated and tested so as to provide students with enough drilling in different aspects. They enable students to have a complete revision of their learned topics. As an educator, we encourage students to develop their potentials and make progress whenever possible. Therefore, if students are capable of learning something ahead of their day school curriculum schedules, they can proceed to learn and practice it under our step-by-step guidance. In fact, some students are doing mathematics three grades higher than in day school. This learn-at-your-own-pace approach renders the learning process more flexible and prepares students for their future academic needs.

Our Objective

Our goal is to motivate and encourage students to learn the basic principles of mathematics and English in a way that they will find both rewarding and enjoyable. Our programs are designed to develop both comprehensive and analytical/grammatical skills which your child can apply.

Individual needs require individual attention. That is why at BC Education Center our teachers monitor each student's progress through daily homework exercises and weekly tests and provide tailored help to meet each student's specific needs.

Building The Bridges

PROGRAM DESCRIPTION

Building The Bridges is a community non profit entity providing reading tutorial services and supplemental education services to culturally diverse students of all ages and educational skill levels. Building The Bridges Organization tailors its reading tutorial with individualized learning plans that are culturally sensitive and builds on the personals strengths and previous success of students and families within the educational school setting. Building The Bridges Organization fosters a comprehensive needs assessment program. Building The Bridges Organization develops ongoing strategies and solutions to continue to align curriculum for meeting the educational needs of "historically under served populations. Building The Bridges Organization will be consistent in mentoring, supporting and enhancing student attendance and parental involvement. Building The Bridges Educational Program will promote student and family sponsored daytime and evening parent involvement events, produce monthly publications, parent student and community newsletters. Building The Bridges Organization will provide opportunities' for all students to meet State Standards and Requirements for student academic achievement(s). Building The Bridges Organization creates a warm, safe and nurturing classroom environment that is conducive to learning team work, respecting others and cooperation and critical thinking. Building The Bridges Organization will involve parent and students in community reading projects, discussions and activities, based on their culture of literacy success. Building The Bridges Organization will provide a genre of literature for cultural and tutorial reading. Monthly reading reviews to support any home reading for students and parents. These concepts will allow for parents and students a family success story. Building The Bridges Organization with the help of students and parents create a web site describing current events, activities and promoting Building The Bridges Reading and Book Club. We will work with students, parents, teachers and collaborating school districts and invite teachers, principals' and superintends to "read along with their students".

PROGRAM DESCRIPTION

Learning is Fun!!! At Carney Educational Services, (CES), we want to engage young people in a variety of learning activities in order to awaken an interest in the world around them and help them imagine their place in it. CES believes that all students can learn when given instruction that is personalized to their performance levels and is presented in an engaging and motivating way. We believe that together with teachers and parents we can close the gap between the nation that reads and the nation that doesn't.

Students enrolled in the CES program are tutored in their own homes, according to their personal schedules. Parent input is sought and respected. Tutors regularly bring parents into the learning process and appreciate their insight. CES tutors are encouraged to report to parents their assessment results and progress during each visit.

Instruction is based on the immediate needs facing each student as diagnosed in the initial assessment and subsequent screens. Our tutors engage, empower and motivate students towards grade level proficiency. There is communication with classroom teachers to make sure each student is receiving the maximum benefits from their tutoring time. This kind of student-centered instruction guarantees the most progress that each student is capable of making; considering where they start and their own abilities.

CES welcomes students who are English Language learners, special education students, and those students far below grade level. Our teachers are bilingual and hand selected to reflect the cultural diversity of the students we serve.

Every tutor providing tutoring:

- Must be fingerprinted by a private Live scan operator, or through their school district of employment.
- Must have a negative chest x-ray or TB test result.
- Are regularly evaluated to ensure quality instruction.

Register today to place your child on the road to educational success!

Catered Learning Solutions

PROGRAM DESCRIPTION

Catered Learning Solutions is constantly striving to meet /surpass Washington State Learning Goals(WSLG), MSP and Grade Level Standards(GLS).

In-home One-on-one Step-by-step Tutoring

Tutoring in-your-home ensures your child's safety and allows for tutor/parent interaction each session. Parent involvement and homework practice, (which we provide) are essential to your child's success. IN-YOUR-HOME OR PLACE OF PARENTS CHOICE

Teacher Contact and Assessments

Placement assessments determine which areas your student will need additional support. This assessment allows the tutor to accurately assess, map, and place the student at the appropriate level for their grade. Along with the teachers input /advice we provide, intense targeted intervention, to accelerate skill development in area of needed improvement. Performance tests and a built in system of formative assessments ensure that students are learning what is taught; every student progress is constantly tracked, analyzed, and monitored to ensure that each student is mastering the material.

Program Materials

With strict adherence to the WSLG, MSP and GLS, our tutors create lessons to ensure no instructional time is wasted. We have systematically aligned our materials to these standards and our company sign-in sheet includes a core content column to ensure that we adhere to these standards at every session.

Our one-on-one, step-by-step-complete- mathematics-curriculum is a comprehensive coverage of math topics in each grade, is mastery-oriented, and emphasizes conceptual development and understanding in a logical sequence, with both explanations and problems. It is a number-learning system covering all of the foundations of arithmetic, upon which all future mathematical knowledge is built. Lessons are arranged to follow the natural and logical progression of mathematical knowledge. Our work-text by topic contains instruction that is on a particular topic, such as multiplication, clock, fractions, etc. Our worksheets are by grade or topic and provide very variable problems in a convenient one-topic per sheet format.

ESD 121

ESD 171

Districts:

PROGRAM DESCRIPTION

Centrolatino will use the data provided by the district along with any teacher and parent input or recommendations in the development of student goals using the State's Essential Academic Learning Requirements.

The curriculum used will be an extension of what the student is using in the classroom as available. Reading EALRs and Math Performance Expectations (PEs), will be addressed by grade level, need, pre, and ongoing assessments, area(s) of focus, and scientific methodology, to name a few. The OSPI web site will be used for additional resources for the EALRs and the GLEs. Supplemental resources will support students in mastery of the learning requirements.

Student progress monitoring will be done on a daily basis by tutors. They will receive training in order to support progress monitoring for each student. The program coordinator will review student progress with tutors each week to make sure students are on target for meeting their goals. Our exit/post assessment will allow us to see progress and communicate with teachers regarding future learning.

The instructional strategies and curriculum to be used in reading will include: Marzano's strategies, guided reading, Balanced Literacy, Scaffolding, and Reading/Writing Workshop., The state's standards, real world connections, applied math, and other resources and strategies will be used depending on the students' needs.

Communication with teachers will be weekly and with parents every other week through progress reports and phone calls. In addition, an Education Information Packet which will include the student's learning plan, will be given to each parent and student as a part of the orientation. This will provide information regarding our services, and expectations for the students, parents, the agency staff and the school. We believe in a partnership with all stake holders. We will do our best to provide information to parents in a language they understand. Right now we have identified support in the following languages: Spanish, Somali, Russian, and Punjabi.

Club Z! In-Home tutoring Services, Inc.

Contact: Cari E. Diaz

Email: ses@clubztutoring.com

Districts:

PROGRAM DESCRIPTION

Club Z! offers two programs of tutoring instructed by highly qualified certified teachers and degreed professionals. Club Z! one-on-one in-home sessions are held at times convenient to parents/guardians and parents do not have to worry about transportation. For families that select Club Z! small group sessions, the groups are kept to a range of 2-6 students per instructor to ensure a highly conducive learning environment. Small group sessions are held on school grounds, public libraries, community centers, and other public facilities determined on a per-case basis and accessibility to public transportation. Total program hours will vary but sessions may be held in either program 1-3 times per week. The Club Z! program is wholly designed to meet the individual needs of students. Club Z! administers individual and group assessments from Pearson Education to enrolled students to pinpoint their academic weaknesses. The assessment(s) used are determined by the student's age, grade, and mode of instruction. Club Z! staff critically evaluates school provided assessment data and current grade level of each student to identify each student's academic needs. The Student learning Plan goals are then written to address the student's academic deficiencies. Club Z!'s successful program centers around the custom-made curriculum created to personally address the student's weak academic areas. Club Z! utilizes Pearson Education curriculum directly aligned with the assessments and EALRs. To maximize individual student achievement in our program, Club Z! trains our instructors in effective instructional strategies. By adapting instruction to the different needs of learners, Club Z! has been highly effective in improving academic performance. Evaluation of student's progress toward the SLP goals occurs frequently and is routinely reported to parents, teachers, and district personnel. Students who have completed Club Z! program have shown an average of one year's growth in reading and/or mathematics.

Districts: Colville School District #115

PROGRAM DESCRIPTION

Colville School District SES provide focused work on standards and instruct those standards using scientifically-based research in their approach.

Colville School District now stands ready to offer SES programs. We know the specific grade level equivalents (GLE) that each and every student is working on. We use a variety of assessments to monitor student's progress and are able to accelerate by one to one or small group tutorial instruction the specific areas identified. Our collaboration with staff in the buildings is seamless, considering it can be the same grade level staff working on similar target areas. Our SES program will be a continuum from Tier I- Tier III through our Response to Intervention (RTI) to our SES individual tutorial programs.

Our Student Led Conferences with parents via SES will be a natural avenue to receive and give input to parents, students and staff regarding the student's needs and progress on a consistent basis. These conferences will be on a scheduled periodic basis designed to prevent any exasperation of frustration by failing.

SES staff will consist of our highest qualified instructors. Colville district boasts of a majority of staff with a Masters degree or higher and many working on National Boards. In addition, we have a 98% completion rate of paraprofessional "Highly Qualified" rates.

If your child could use some extra help, then allow Colville School professionals to work with them or take advantage of another SES provider. Together we will succeed.

PROGRAM DESCRIPTION

With over 2.5 million members around the world, the Enopi program has been extensively used for 30 years worldwide. It has been selected not only to supplement the curriculum at school, but also to help parent support students to continue learning in the home environment.

Enopi MATH is a flexible, individualized self-learning program that provides a systematic and progressive approach to improving learning in math. It is designed to encourage analytical and critical thinking skills in K-8th grade students. Colorful booklets and various teaching tools (or manipulative) enhance their studying in Math. Studies have shown that students who studied Enopi MATH scored better in the state math standard test and math aptitude test than those who only studied with traditional textbooks.

Enopi ENGLISH has been created to provide instruction in specific area of the English language. Starting from learning the phonemes and how to read, the curriculum covers up to 8th grade levels including the different types of writing. By working on booklet levels according to their individual levels, students are able to progress at their own pace. Practice booklets will also supplement the main workbooks for students to repeat the new concepts on their own.

+Tutoring will be done in a 1:1 basis for English; a small group of 3 students per teacher is allowed for Math. 2 – 3 sessions per week with 1 – 1.5 hours per session is recommended, but the schedule is to be determined by the parents and the instructors. Tutoring may take place either at the students' home or at a nearby public library, depending on the parents' choice. All tutors will be at least college students or graduates who have passed Daekyo's Qualification Tests.

East African Community Services

Contact: Abdirizak Jama

Address: 7054 32nd Ave S, Suite 207
Seattle WA 98118

Served: District

Phone: (206) 721-1119

Fax: (206) 445-7969

Email: abdirizak@eastafriancs.org

Districts: Highline, Seattle, Kent, Federal Way, Tukwila

PROGRAM DESCRIPTION

East African Community Services (EACS) is an inclusive organization that is dedicated to improving the well-being and quality of life of refugees and their families in King County, while at the same time encouraging our clients to preserve their diverse cultural heritage. Located in the heart of New Holly, a Seattle Housing Authority neighborhood, EACS is a community-based organization serving East African refugees in King county for nearly a decade. Members of the EACS staff are able to assist families in several languages, including Somali, Oromo, and Arabic.

Education services at EACS start with an individual assessment of each students' strengths and weaknesses. Parent/guardian feedback is welcome and invited as the initial instructional program is designed to address weaknesses and bring the student up to grade-level performance; parent/guardians will continue to receive monthly written reports from EACS on their students' progress and attend a quarterly parent-tutor conference to discuss in-depth the particular challenges and successes of their student.

Most tutors are Instructional Assistants from within the school: trained and successful at working with students from diverse, ELL backgrounds. All instructors undergo a thorough training and orientation to ensure consistent, quality tutoring that is culturally sensitive, confidential, and effective, and the method of instruction is aligned with the school district's curriculum.

In addition, EACS has a wide array of complementing support services to provide wraparound support for East African families in King County schools, including ESL Talk Times, Citizenship Instruction, Computer Literacy Classes, parent workshops, family support case management, and a summer program for children to prevent learning loss over the summer months.

Educate Online Learning

Phone: 410-843-2672

Fax: 410-843-2629

Email: state@educate-online.com

Districts:

PROGRAM DESCRIPTION

Educate Online Learning, LLC is America's leading provider of live, personalized, at-home tutoring. Educate Online has successfully served more than 56,000 students since 2002. All tutoring takes place online, and Educate Online provides computers and internet access, if needed, at no charge.

Students log on to a virtual classroom from home, while their instructor logs on from another location. Students can speak directly to teachers, all U.S. state-certified, and they share the same desktop, so they can work together effectively. On average, students who complete either our math or reading program gain a grade level in skills.

Students typically take two to four 60-minute sessions each week. Sessions are offered seven days a week, after school and on weekends. Families are able to choose the days and times that work best for them. Sessions take place in the safety and convenience of each student's home – eliminating the need for transportation.

In a 2010 study, 82% of students said their Educate Online work helps them do better in school, while 64% said their grades have improved since working with us. Parents agreed, as 88% said Educate Online helped their child do better in school, and 94% indicated that at-home tutoring was an effective alternative to other tutoring programs.

Educate Online has a secure, password-protected Parent's Portal, available 24/7 allowing parents to set tutoring schedules and see progress reports after every session. We have a trained bilingual (English and Spanish) call-center staff supporting families through the program, who handle technical problems, parent questions, and any issues that may come up during the program. Our help line is open during business hours, and any time tutoring sessions are offered. Educate Online also uses a translation service that supports 170 different languages, allowing us to work with most parents.

PROGRAM DESCRIPTION

Education Empowerment Foundation, Inc. (EEF), a company with five years experience in offering tutoring services provides instruction to children in kindergarten through grade five, in reading and mathematics. EEF tutors are experienced, degreed professionals and/or state certified instructors. The company provides all materials and supplies. Students must be enrolled in a school eligible to participate in the program.

Tutors work with small groups of up to eight students. The sessions are scheduled three times each week and each session is two hours long, for a total of 30 hours. Tutoring sessions are held at local schools and directly after school hours. Transportation is not provided by the company. Tutors tailor individualized learning plans for each student that build the skills and habits students need to succeed in school.

PROGRAM DESCRIPTION

At the Education With Purpose Success Academy (EWPSA), we pride ourselves in placing students with highly effective, extremely encouraging and very proficient instructors. We assist children in the 3rd-8th grades by helping to improve their reading and math skills.

Students are tutored in small groups according to their similar grades, abilities and/or academic needs. Sessions are generally held after school, in the evening, or on a weekend, at a time convenient for the student and parents. Each tutoring session may be hosted in the family's home, at school, a library, or other suitable location. Sessions are 60 to 90 minutes in length (depending on age of student), and held two to three times per week.

Our goal is to enable each student to take control of his and her own education. By helping them improve their academic performance, we can also help increase their self-confidence and motivate them to thrive in other areas of their life. We plan to accomplish this by using effective resources and innovative techniques, which include music-based material, game-based and hands-on activities.

We want to teach all students how to enjoy the process of learning new information in order to cultivate a lifelong passion for education. We will also utilize consistent and efficient monitoring techniques. This will help us to ensure that each and every student benefits from our excellent service and outstanding curriculum.

Once you select EWPSA as your supplemental education services (SES) provider, the sky is the limit for your child! We look forward to working with you as you prioritize your child's success.

PROGRAM DESCRIPTION

The EXcel Program, provided by ESD 112 in Vancouver, is a student-centered extended day learning program. We offer instruction in math or reading for qualifying elementary students in grades K-6. Services are provided at your local school usually two days a week for an hour, right after school each day. Each student will have an individualized educational plan. Instruction will be delivered in small groups of no more than 1:3. Instruction is in English with assistance given to students who are learning English as a second language.

Parents will choose either reading or math as a focus for their child. If reading is chosen, instruction will focus on phonemic awareness, phonics, and vocabulary for beginning readers and fluency, vocabulary, and comprehension for older students depending on what is needed most. Mathematics instruction will target number sense and operations and include mathematics vocabulary and specific skill development.

Tutoring will be provided by highly qualified certificated teachers, often from the student's school, who are familiar with Washington State standards and the district and school curriculum. Student learning goals are identified using assessment information along with input from the student's regular classroom teacher.

The staff of the EXcel Program will work hard for each student to help them achieve academic success. To reserve a space for your child in the EXcel program, contact your school district to request EXcel from ESD 112 as your Supplemental Educational Service provider.

ESD 113

Districts:

PROGRAM DESCRIPTION

Educational Service District #113 will provide one-on-one and small group tutoring and educational services in reading and math for qualified students in grades K-12 who are below grade level. The purpose of the Educational Service District #113 is to assure excellent & equitable education for all students through service and collaboration and we do this in partnership with our school districts by providing quality-education programs and services. Our goal of this educational program and service is to help students reach grade level and enhance their educational performance in school through supplemental educational supports provided before or after school, on weekends, during intersessions, or during summers. All students will receive diagnostic assessment in math and reading, student learning plan, access to educational staff, and educational services that include regular and ongoing feedback and reports of progress. Educational services will also include supports and information for parents and caregivers in order for them to address student educational needs.

ESD 123

Districts:

PROGRAM DESCRIPTION

Educational Service District 123 works closely with schools, teachers and parents to help students meet Washington state standards in Reading and Math and improve their performance on the Measurements of Student Progress. The ESD 123 afterschool program is a student centered extended day learning program offered at school sites and is scheduled for 2 days per week for one hour each, right after school each day. Program services include instruction in reading and math for qualifying students in grades K-6. Students will have an individualized educational plan that is developed with input from the student's teachers and parents. The student plan will identify which educational strategy will best benefit the student, i.e., blending online learning with one-on-one instruction and small group instruction with student to teacher ratio of 1:5.

The additional academic support will be provided by certificated Washington state teachers along with paraprofessionals who are familiar with school district standards and curriculums. Student learning goals are identified using assessment information along with input from the student's classroom teacher.

ESD 123 will provide quality programs and services assuring excellent and equitable education for all students through service and collaboration in partnership with our school districts and parents. We will help students fulfill their learning goals by "Delivering Collaborative Solutions That Promote Learning."

One Team...Helping all students realize their dreams and aspirations. We are ESD 123!

PROGRAM DESCRIPTION

Eduvelop (formerly WASLPASS) is an experienced Washington State Supplemental Educational Services (SES) provider offering tailored personal tutoring programs designed to help students develop and improve their reading and math comprehension skills.

Our success is based on the combination of an extensive library of subject content developed with strict adherence to Washington State Grade Level Expectations and a time-proven computer-based training program which has been used to successfully prepare students in academic and professional environments for more than twenty years.

Our SES program offers:

- One-to-one personal instruction in your home or other convenient location
- Group instruction
- 100% online distance learning with free telephone support

Our online courseware is included with individual and group tutoring, and is available to students with computers and internet access on a 24/7 basis even after live instruction hours have been completed.

Eduvelop's qualified staff is prepared to work with students from Kindergarten through 12th grades, and includes Spanish and Vietnamese-speaking tutors.

The Eduvelop program is available at no cost to qualified Title I/SES students and families throughout Washington State.

You may demo the software by going to our website at www.eduvelop.com or calling our toll free number 1-888-927-5727.

PROGRAM DESCRIPTION

At Eduwizards all online tutoring is one-to-one and can be conveniently taken from student's home. We provide free computers to students who don't have one and also pay the internet bill. Tutoring takes place using our virtual classroom, which includes white board, text, and voice chat. Along with instruction, continuous online assessments are conducted to map student progress and identify areas of strength and weakness. Our research and data indicates that this combination of tutoring and assessment gives students a higher jump in performance.

The classroom size is one student and one instructor which allows for maximum concentration, focus, and attention. The tutor can take individual care and pay attention to the student's need. All our sessions are recorded online and available for later viewing by students, parents and tutors.

Eduwizards curriculum is fully aligned to state specific benchmarks. Curriculum materials, including individual lessons developed by experienced educators, are already part of our curriculum library, and can be uploaded into the tutoring session virtual classroom.

To carefully monitor student progress we have devised a two-education-experts per student system (one being the tutor and the other the tutor-coordinator). These experts continually monitor student progress.

Our tutors are USA-based and most of them are state certified, with a Master's degree or higher. We have an open review system where after each online session the student has an option to review the tutor. This helps Eduwizards to openly identify and retain only the best online tutors. We offer bilingual tutors who focus on state-specific standards. Regular studies conducted using pre-assessment and post-assessment show marked improvement in the performance of our students. The effectiveness of our program is further demonstrated by the fact that our web site is full of great reviews from satisfied students and parents.

PROGRAM DESCRIPTION

Learning is a true adventure and will open many doors. Despite this, many students are unable to fully appreciate the joy that should come about as a result of acquiring an education, simply because they don't understand. At Empowering Youth and Families Outreach (EYFO), our instructors can help your child succeed and overcome the frustrations associated with school. Our tutors focus on the whole child, assessing, evaluating, and monitoring each student, and working with them at their speed, helping them to realize their potential and helping them discover the joy in learning. Serving grades K-12, Empowering Youth and Families Outreach tutoring program provides one-on-one curriculum instruction aligned to state standards, emphasizing individual student progression and achievement. EYFO's program is unique and dynamic, running throughout the school year on-site, or at an agreed upon location. We utilize district materials and ensure that materials are aligned to the Washington State Grade Level Expectations. EYFO's supplemental services are designed to support what students learn in school—directly, through homework help/tutoring, and indirectly, through games or other activities that build reading, writing, and math skills. Our goal is to work more closely with school districts to develop collaborative relationships with the staff, students and community to help close the achievement gap. Specific student populations served are low-income, minority, limited English proficient students, students with learning disabilities and/or behavioral problems, and at-risk youth. Parents will receive a detailed instructional plan is created defining the goals and objectives based on the needs of the student, as well as quarterly progress reports. By choosing EYFO you'll get real results, and your student will develop confidence and a positive attitude through self-paced progress and genuine achievement.

PROGRAM DESCRIPTION

Children are the most precious resource a nation can have. The future depends on the kinds of children we raise. At a time when the global economy has created financial insecurity, and at a time when jobs are scarce, and time is virtually non-existent, the quality of a child's education may not take foremost importance. Evergreen Human Development Academy wants to assist the wonderful parents and teachers who are educating and raising children with more and more limited resources. We want to build a bridge between the students and teachers, between teachers and parents, between parents and children, by creating a virtual database of each child's character, strengths, behavior, personality etc--- thereby creating comprehensive info about the child, which can help in devising a program that will develop a well rounded student. This will create a net for each child so he/she does not fall through the cracks.

We supplement the curriculum at school by ensuring the homework is completed and also by augmenting the study materials to help him/ her have a deeper understanding of the subject matter they are learning about. We use effective studying methods that help the children excel in school and later on in life. We research methods that have been used before to turn out high performing students. We use the same tactics to engage the children in activities that will help him/ her meet the potential inside.

Our whole effort is to create a fun, learning environment, where we produce children who develop life skills that will help them have a high performance in life. To achieve this, and to raise children who will grow up to fulfill high ideals of excellence and integrity. we partner with the schools and the parents.

Districts:

PROGRAM DESCRIPTION

It is the belief of the Extraordinary Environmental Institute (EEI) that all children can learn if given the individualized instruction, time and attention each needs to be successful. We also believe that children reflect their homes, communities and cultures. Our educational program will reflect the uniqueness of each individual, celebrating their backgrounds, gifts and contributions.

Research shows that pre-teaching subject matter which the students are likely to encounter builds confidence, improves understanding and performance. Our model will be based on this research. Instructional programs will be provided during summer vacation, school breaks and before new units are introduced during the school year.

Certificated teachers will work one-on-one to address the individual learning needs to each student, communicating with the school and complimenting the efforts of the classroom's instructional program and curriculum.

Children who struggle need more time on-task. Many need a longer learning day, but with a different approach to learning than is used in the classroom. In addition to individual tutoring, small group learning strategies will be employed that make learning fun, while reinforcing essential learning.

Relationships matter. All students need to know that they are valued and respected. They need to know that others have high expectations of them, and hopes that they will accomplish great things in their lives. For this reason, we place our Supplemental Educational Services in the community in which they are a part. By partnering with churches, Boys and Girls Clubs and community centers, we can work together to provide the wrap-around support that children need to be successful. Through contacts with mentors who use reading, science and math in their every day work, students will develop an understanding of the importance of these subjects for their everyday lives.

PROGRAM DESCRIPTION

Since 2007, Family Youth Service Center has been running a few different academic tutoring programs that focus exclusively on improving student's schooling and meeting the Requirements for state exam. Our overarching goal at the Family/ Youth Services Center is to ensure that every child succeeds in their academics. Comprised of "schools in need of improvement," the FYSC has undertaken a number of initiatives to advance this cause such as after school programs, extended academic assistants beyond school year, and tutoring. We can provide help to children to succeed in school by giving them the chance to sign up for free tutoring at their meticulous school location. It is a great opportunity to help the children in their schooling without any cost to parents because of certain circumstances; in that way we help out the children in areas like math, reading, and language arts.

PROGRAM DESCRIPTION

FFI education program is designed to guide and assist the youth who are non-high school graduates in the adventures of learning and discover a new world of knowledge. Through individual attention, an environment conducive to learning, along with great educators, FFI is committed to develop the young minds of today to become the bright minds of tomorrow. FFI offers supplemental learning in order to enhance the overall educational experience. FFI instructions in Math and English instill confidence and a positive attitude in students by providing support and reinforcement. Using the results of a Basic Assessment Skills test, we create a personalized curriculum that addresses and eliminates underlying issues. Through positive reinforcement and individual attention, we ensure that each student achieves success. Our programs offer reading, language arts and math assistance to those students who are struggling in these areas.

PROGRAM DESCRIPTION

ALL TUTORING PROVIDED BY WASHINGTON STATE CERTIFIED TEACHER, MELVIN F. GALLUP M.Ed.

Peninsula Tutoring offers one-on-one and small group tutoring in mathematics to students in grades 3-8. Peninsula tutoring is characterized by preparedness, compassion, and reliability. Tutoring will shadow your student's classroom instruction reinforcing and re-teaching standards depending on the individual student's needs.

The Mathematics program is aligned to Washington States Core Content/Performance Expectations (Previously EALR's).

Student's initial assessment will be determined by existing MSP, MAP, and STAR Math test results and communication with child's teacher and parents.

Assessments written to State Standards as well as assessments in the IXL, Aleks, Accelerated Math, HBJ, and Everyday Math Curriculums will be used to determine real time student progress and will also be used to manage and teach the Washington State Standards. Instructional materials will be those that are currently being used in your student's classroom. Tutor is very familiar with curriculum that is presently being used throughout the county and has an in-depth knowledge of all curricula available for instruction and evaluation.

Frequent communication with fellow teachers and parents will be used to target individual student needs. Formal Progress reports will be provided to school districts and parents on a monthly basis or more frequently when requested.

Tutoring will take place at local public and private facilities based on student need, parent request and facility availability. The tutoring will take place after school, on weekends and during the summer break.

PROGRAM DESCRIPTION

Genius Academy offers one-on-one and small group tutoring programs in reading and mathematics. Genius Academy has highly trained tutors with over 30 plus years of combined experience in teaching and tutoring in all subject levels. Our goal is to help students meet academic benchmarks described in Washington's Essential Academic Learning Requirements and National Academic Learning Requirements.

Genius Academy will provide tutoring in the family's home, at school, library, or other suitable location. Small group tutoring consists of no more than five students of similar ability, grade, or academic need. Sessions are generally held after school, in the evening, or on a weekend, at a time convenient for the student and parents.

Sessions are 60 to 120 minutes in length (depending on age of student), and held two to three times per week.

Genius Academy recognizes that academic excellence for students requires a focus on understanding, supporting and teaching the whole child- academically, socially, and physically. We have an Afro-Centric approach to education which addresses student engagement and parent education. Our goal is to be intentional in delivery of instruction to each individual student.

A student profile is developed with input from all of a child's stake holders including teachers, administrators, and community advocates. Once students are assessed, a plan with specific goals to target gaps is developed. This plan includes a timeline in which goals should be met and strategies to be employed and home and school for student accountability towards these goals.

All work and progress is recorded in portfolio format including various hands-on projects that demonstrate student progress and learning.

Additional electronic reports are made to students, parents, schools, and district stake holders quarterly.

PROGRAM DESCRIPTION

Global Partnership Schools has offered families a premium tutoring option for two years. We provide a program that promotes academic achievement by establishing relationships between teachers, parents and students. Our certified teachers work in small groups using a strong curriculum designed to bring students up to grade level. Outside of class, students may continue learning by accessing secure online activities over the Internet.

We typically teach two 90-minute sessions during the week after school. We also offer optional 3-hour Saturday sessions in some districts. Each class begins with a healthy snack, followed by KidTalk, a lesson to help your child be successful in school and in life. Then, targeted instruction in reading, writing and math is designed to help students improve academically. We celebrate successes with you and your child and constantly encourage students to work harder.

Give your child the world! Sign up with Global Partnership Schools today!

Districts:

PROGRAM DESCRIPTION

24horasdetutoria provides exceptionally high quality tutoring to students who require that little extra help. The key features of our instructional program include one to one instruction, live tutoring, use of state aligned curriculum, flexible time-tables, high quality researched material, experienced tutors, convenience, rigorous monitoring of student progress and involvement of teachers and parents at each step of the student's development.

We provide flexible, and customized tutoring solutions. Our program encapsulates the needs of the students and uses it to target instruction. We use WASL Achiever! test as our assessment test to assess the student's strengths and weaknesses and develop Student Learning Plans and a focused timetable. We communicate the results of this Assessment Test along with our proposed Student Learning Plan to the parents/guardians, and schoolteacher. Their approvals as well as suggestions are requested before we proceed in commencing our tutoring program. The progress of the student is stringently monitored through monthly progress reports. Progress reports define each student's educational goals as stated in their Learning Plan, lesson scores/achievement level, attendance, and tutor comments regarding participation and progress, and student's progress within the curriculum. All reporting complies with NCLB and FERPA confidentiality provisions. The Student Learning Plan acts as a standard against which the student's progress is measured and is accordingly updated for the next month to reflect progress towards established goals and objectives. The progress reports may be provided in English & Spanish.

PROGRAM DESCRIPTION

Group Excellence provides online and in-person mentoring and tutoring to students in grades 3-12. Students may participate in any of our program models based on individual needs. We offer:

- Small-group tutoring in-person with our trained staff. We provide all the required materials including workbooks and other related resources. Tutoring is typically provided after-school at the student's campus if it is available.
- Interactive distance learning accessible 24/7 online via an internet-connected computer, tablet, or mobile device. Students get real-time feedback on their progress, and can chat with tutors live.
- Tutoring is based directly on the same curriculum standards used by schools throughout the state, so it supplements what students learn in the classroom and can be expected to improve both in the classroom and on state exams.

PROGRAM DESCRIPTION

The Language to Literacy Program is an evidence-based reading program that incorporates the most current research. Participants work in small groups (1:3 ratio) with Speech-Language Pathologists to master the foundational skills essential to reading and spelling success.

This program may help students who have difficulty with:

- Reading or spelling
- Paying attention and listening
- Asking for help when they do not understand something
- Following directions or remembering information
- Staying organized
- Remembering the meaning of new words

Results of post-testing have shown significant improvements on standardized tests, and, more importantly, reports from parents, teachers, and students of functional improvements in the classroom and at home.

The program is available to students 6-13 years of age.

Each class is 90 minutes in length. During the school year, classes are held twice a week after school for 10 weeks. During the summer, classes are held three times a week for 7 weeks.

PROGRAM DESCRIPTION

Hearts for Kids at Northwest Leadership Foundation is a program that was founded by two caring parents who volunteered at their children's schools. Seeing the need of adult mentors in the school birthed the idea of offering after school programs to elementary level students with a mission of empowering our youth through encouragement, guidance, and support from parents, school and community. We provide after school academic and enrichment activities within the schools. We also bring resources available in the community into the school building, for we believe that the school is a place where connections occur for students and families in need. We worked closely with our principals and staff to access the need within our schools. We pride ourselves in partnership, as we know that we can't do it alone. We stand firm on the belief that "It takes a caring village to raise a child and that village is all of us."

PROGRAM DESCRIPTION

Helping Link assists the Vietnamese community of King County in the studies of Math, English, Science, and Computer skills. For the young, Helping Link is a tutoring center, designed to help students after school with their homework during the school year. Helping Link hosts a Summer Youth Program for students to continue learning while on summer break. Through this program, students continue their practice of Math, Reading, Writing, and Science while having the chance to take educational field trips around Seattle. For the elder members of the community,

Helping Link serves as a bridge between the community and the rapidly advancing world. Helping Link offers Citizenship classes to prepare students to take the Citizenship test, Computer classes to inform students how to use a computer, and English as a Second Language classes for those who still need to learn English. Helping Link serves as the bridge between the Vietnamese and America and a safe haven for a widely spread community.

Helping Link helps to assist students in strengthening their reading comprehension and writing skills. Our goals are to help students to be more successful in school, particularly in the area of literacy, while supporting their sense of cultural identity, strengthening the connection between what they are learning in school and what they are experiencing at home.

Through the Summer Youth Program, we help students do the following

- Build vocabulary skills
- Improve reading comprehension
- Understand and use a writing process
- Intertwine the relationships between reading and writing
- Continue creating a foundation for math
- Increase engagement in learning
- Promote lasting peer relationships
- Promote creative expression through art and writing
- Engage in positive identity development

PROGRAM DESCRIPTION

Highline Tutoring and Testing Center opened 28 years ago and became a partner of the SES program several years ago. Our experience has found that most students who struggle with reading, writing or math have low achievement in other subjects, which is verified by their test scores.

Our curriculum is based on these findings. Therefore, we take a whole language approach to teaching these basic skills. The language approach to math skills is used and has led to the successful mechanical operations for math and better understanding of story problems. We stress written language, since writing skills are an integral part of any student's curriculum. The reading curriculum includes researched-based materials that enhance reading comprehension, fluency and vocabulary development.

Our tutors use teaching techniques that cater to the learning styles of each student styles of each student to advance skill development. They encourage the input of the parents, teachers and counselors of the students.

We are very good at working with students with learning disabilities such as autism / Asperger's, brain injury, ADD and ADHD. We enjoy working with these students.

The locations used for the SES tutoring sessions include Highline Tutoring's office in Burien, the student's school, local libraries, community centers, and student homes. We would prefer to have a minimum of two students from a school district but will consider special circumstances for a single student.

PROGRAM DESCRIPTION

Holy Family Parish School has been approved to provide Supplement Educational Services (SES). Holy Family Parish School is an accredited school that has been providing a quality education in the White Center community for over 80 years. We provide a safe and secure environment that allows our students to be happy and to learn. Our curriculum follows the Washington State Essential Academic Learning Requirements (EALR). We have a staff of highly qualified teachers and tutors that provide outstanding instruction consistently allowing over 90% of our graduates to go to the high school of their choice. Our students consistently score well on the Washington State Measurement of Student Progress (MSP) examination and the Iowa Test of Basic Skills (ITBS). If your child qualifies for SES, or you think that he or she might, please call us at 206-767-6640 and ask for Mr. Cantwell. I will be happy to discuss the program, show you our school, and answer any questions that you might have.

PROGRAM DESCRIPTION

HAEC is a Seattle based nonprofit organization dedicated to the academic achievements of K-12 students with special emphasis on low performing East African students. HAEC exclusively works in the education arena; it aims to build a healthy community by providing extra learning time and opportunity for K-12 students and parent school connections. Since its inception in 2004, HAEC has been contributing to the academic enhancement of East African communities in Puget Sound Region, specifically in White Center, Southwest, Tukwila, SeaTac, Kent and Southeast Seattle neighborhoods. Every academic year HAEC collaborates with most of King County local school districts namely Seattle Schools, Highline Schools, Kent Schools, Renton and Tukwila School Districts and with over hundred parents to help students cross the threshold of academic success.

HAEC's Programs: HAEC runs different academic tutoring programs that focus exclusively on improving student's performance in core academic subject areas such as math, reading, and writing. These tutoring programs include:

- Supplemental Educational Services (SES)
- Refugee Impact Grant (RIG), a federally funded Title III Program to provide academic enrichment opportunities to refugee students.
- 21st Century grant in Secondary Bilingual Center, BOC in collaboration with ReWA.
- Home School Resource Center with over 65 students and their parents on daily basis
- Summer School (an intensive course for six weeks)
- Week end cultural and social classes for children and parents
- High Point East African Youth Leadership supported by Seattle Housing Authority

HAEC's SES program is goal oriented and focuses on improving the academic performance of eligible students: by providing academic support activities that are aligned with the Washington State's Standards to meet the academic requirements of elementary, middle, and high school students.

Student Assessments: HAEC administers two assessment tests:

- A Comprehensive Math Assessment (CAM) comprising of hundred questions used to identify students' skill-levels in basic computation skills. This test helps the SES program management and the staff to select customized and appropriate materials to each student's specific needs.
- A written Analytical Reading Inventory (ARI) assessment that is used to identify student's literacy level. This covers phonemic awareness, sight words, spelling, vocabulary, reading, comprehension skills.

PROGRAM DESCRIPTION

Horn of Africa Services is a non for profit agency that promotes community centered and holistic approach to its After school Program focused on students' needs. School year tutoring is held at Rainier Vista, on Tuesdays and Thursdays, and at New Holly, Mondays and Wednesdays, for two days, 2 hours a week mainly in math, reading and homework assistance. Our tutors are recruited from Universities and communities. Paraprofessional tutors and volunteers run the program with the direction of HOAS Executive Director and a program coordinator. An outreach staff encourages community and parents' involvement in their children's education through information dissemination, and mediating between schools, school teachers and parents. Creating a safe environment where students learn and enjoyable learning atmosphere is central to our program's goal. Share ideas with the students and/or learn more from our website: www.hoas.org

PROGRAM DESCRIPTION

We provide individualized, one-on-one tutoring in a safe online environment. In order to serve the students from low- income families, we provide the laptop & other required technology to take our classes, free of cost. Our tutors are experienced in their subjects and ensure that high quality instructions trigger maximum students' performance in minimum time.

A standard tutoring session will be for 90 minutes, 2 times to 3 times per week. The virtual classroom has a whiteboard where the tutor and students can share their problems and work on the lessons. It has a tools panel (pen, graphs, eraser, etc) to facilitate the learning process. The student and tutor communicate through chat.

Our tutoring program conducts pre and post assessment tests (Plato® EduTest) to be able to compare and pinpoint the exact students' achievements. It is a quick, accurate, research-based assessment that helps us to target instruction for student success.

The parents are provided with monthly progress report, containing the number of learning activities that the student completed during previous tutoring sessions along with the scores they earned on each of the activities, and the total number of hours of tutoring that the student has participated in.

Our program over the last three years has serviced more than 1500 students. The tracking of improvement indicators was completed in all the years. Our program concentrates on mastery level achievement. This means that each skill is taught and assessed based on the ability of the student to understand and show evidence of scoring 80% or above on skill assessments.

PROGRAM DESCRIPTION

Ivy League Tutor (ILT) is an online SES provider that utilizes web-based tutoring in Reading and Mathematics for grades K-12. Students receive web-based tutoring at home, under parent supervision and with the support of an ILT tutor. ILT students and their families are not required to own a computer nor have an internet connection in order to participate in our program. ILT believes that technology enhances the learning experience and every student should have access and use of technology. For this reason, ILT supplies a computer and a mobile broadband internet connection to each student. Because ILT students have the freedom to learn from anywhere, they utilize the online learning experience to maximize their academic potential. IVY LEAGUE TUTOR: EDUCATION WITHOUT LIMITS!

PROGRAM DESCRIPTION

For the past four years, we have been successful in providing high quality tutoring resulting in increased academic achievement for students in K-12 in reading, math and ESL. Parents' testimonials indicate that our instructional program has helped their students improve their grades in school, attendance, and improve their self-confidence as they become successful in school. We address students learning styles through a unique blend of highly differentiated and engaging tutor-directed instruction and student-centered technology. Students are provided with login information for the web-based component of our program in reading and mathematics. They have access to the program 24 hours, 7 days a week. Students are able to review taught skills and concepts and monitor their learning through the VPORT program management software that tracks student performance in an ongoing basis. Parents and teachers also have access to this program and are able to monitor their students' progress and how tutoring is progress. Students who do not have access to computers are provided with computers for use during the school year to be able to use the web-based component of our program. We pick up the computers from students at the end of the school year. We provide services in 1:1 and small group settings. Services are provided daily in home, school sites and libraries, 2 hours/session, 4 hours/week up to 30 hours total. We begin program with pretest to diagnose student needs, work with parents to develop student learning plan with measurable goals and timelines. We report student progress monthly. Parents select two days per week that best fit their schedules. We provide bilingual support and all instructional materials at no cost.

PROGRAM DESCRIPTION

Outreach will focus on improving the academic skills of its youth participants by focusing on Essential Academic Learning Requirements for the state of Washington. Seventy percent of the Outreach youth participants and their families are refugees and immigrants from East Africa, primarily Somalia and the Sudan, the Ukraine and other former Soviet Union countries. Young children and youth in these families often do not acquire much academic learning until they enter and attend school, much as their older siblings did, with their primary spoken language that of their parent's native country. Additionally, most of these students themselves are English-speaking but lack pieces of the linguistic or academic background necessary to be completely competitive at a cognitive academic level in a classroom or life.

In order to participate in daily activities, youth must first complete 30 minutes of academics such as homework, tutoring assistance, school projects, computer classes, life-skills workshops, community service projects, or reading. Currently we provide E.L.L. once a week using methods developed by The Institute for the Achievement of Human Potential with over 50 years of research in early childhood development. Also, we use computers with real world learning scenarios and several variations of online instruction provided by StudyIsland.com. Along with the above academic improvement programs, Outreach will also utilize trained staff and volunteer tutors to help students achieve success.

The Outreach program goal is to improve youth participant's academics levels to age appropriate grade levels. KYFS anticipates the impact on these youth will be improvement in school performance, increase in self-esteem, reduction in dropout rates, and graduation from K-12 on time.

Phone: (360) 536-5689

Fax:

Email: KingstonLearningCenter@yahoo.com

Districts: North Kitsap School District

PROGRAM DESCRIPTION

Kingston Learning Center is an independent tutoring center located in the heart of Kingston. Kingston Learning Center specializes in math instruction to students of all ages, from kindergarten to college prep. Our mission is to build not only your child's math skills, but also their self confidence in their own abilities as a student.

At Kingston Learning Center, each student is evaluated to determine specifically what their level of ability is and where their knowledge gaps occur. Then we create a custom program for each student. This approach allows your student the greatest opportunity for success.

Our program involves a combination of small group instruction (up to 3 students per teacher) and practice on computers. One on one tutoring is also available. Our instructors are experienced in teaching math to those who struggle and are experts at making it as easy to learn as possible. We believe in keeping a positive environment that supports student success and minimizes the stress many feel when facing math obstacles.

Kingston Learning Center is conveniently located in the town of Kingston (in the Country Pet Shoppe building), close to both Kingston Middle School and Kingston High School. There is also a school bus stop right outside servicing the middle school, high school and Gordon Elementary. Kingston Learning Center provides services to students from all North Kitsap Schools as well as home-school and private school students.

PROGRAM DESCRIPTION

Koinonia offers one-on-one and small group tutoring programs in reading and mathematics. Koinonia Academy has highly trained tutors with over 30 plus years of combined experience in teaching and tutoring in all subject levels. Our goal is to help students meet academic benchmarks described in Washington's Essential Academic Learning Requirements and National Academic Learning Requirements.

Koinonia Academy will provide tutoring in the family's home, at school, library, or other suitable location. Small group tutoring consists of no more than five students of similar ability, grade, or academic need.

Sessions are generally held after school, in the evening, or on a weekend, at a time convenient for the student and parents.

Sessions are 60 to 120 minutes in length (depending on age of student), and held two to three times per week.

Koinonia Academy recognizes that academic excellence for students requires a focus on understanding, supporting and teaching the whole child- academically, socially, and physically. We have an approach to education which addresses student engagement and parent education. Our goal is to be intentional in delivery of instruction to each individual student.

A student profile is developed with input from all of a child's stake holders including teachers, administrators, and community advocates. Once students are assessed, a plan with specific goals to target gaps is developed. This plan includes a timeline in which goals should be met and strategies to be employed and home and school for student accountability towards these goals.

All work and progress is recorded in portfolio format including various hands-on projects that demonstrate student progress and learning.

Additional electronic reports are made to students, parents, schools, and district stake holders quarterly.

Phone: 425 335 1500

Fax: 425 335 1549

Email: graham_cook@lkstevens.wednet.edu

Districts: Lake Stevens School District

PROGRAM DESCRIPTION

The Lake Stevens School District will provide free Supplemental Educational Services (SES) in the form of before and/or after-school tutoring to qualified students. Tutoring will be provided by certificated teachers and directly support school district and state learning standards. Students will receive tutoring either individually or in small groups.

It is our intention to build a team of support for our students. Tutors will work closely with classroom teachers and parents to identify the unique learning needs of each qualified student. A plan specific to the needs of each child will be collaboratively developed by tutor, teacher and parent. The plan will include short-term and long-term learning goals that align with classroom and state performance expectations.

Specific learning needs of qualified students will be identified using multiple assessments both in the regular classroom and during tutoring sessions. Tutors will utilize proven interventions and instructional strategies that target identified needs. Tutors will maintain communication with classroom teachers, providing regular feedback regarding student progress.

Tutors will also maintain regular communication with parents. An initial meeting will be held to share information and to collaboratively develop the learning plan. Tutors will then provide regular feedback about student progress and the type of support that could also be provided at home.

PROGRAM DESCRIPTION

Motivating Our Children To Honor Academics (M.O.C.H.A. MENTORING) is a comprehensive after-school mentoring program that offers experiential academic, personal development and athletic training to inner-city youth. M.O.C.H.A provides a safe environment where learning and growth are encouraged.

M.O.C.H.A. strives to go beyond traditional models of mentorship by exposing our clientele to a diverse team of mentors, ideas and opportunities that will help them better shape their current behavior and future goals.

Together, we've established tutoring routines that are predictable, consistent and in-line with state standards. We are committed to maintaining an inclusive atmosphere that encourages self-efficacy, self-expression and relationship building. We strive to enhance the educational, social, physical and intellectual growth of the youth we serve, so they can become healthy productive young adults.

Districts:

PROGRAM DESCRIPTION

Mathnasium is a learning center where kids go after school to boost their math skills. We are highly specialized; we only teach math. Our program is for kids in grades 1 through 12. Students attend once or twice a week, for about an hour. Our goal is to significantly increase a child's math skills, understanding of math concepts, and overall school performance, while building confidence and forging a positive attitude toward the subject.

The Mathnasium Method uses a unique combination of mental, verbal, visual, tactile, and written techniques to help children learn math.

MENTAL

Students are taught how and when to use mental math techniques. This enables them to dispense with needless paper-and-pencil work and focus on the task at hand.

Example:

$$99 + 99 + 99 = \underline{\quad}$$

Instead of setting this problem as a vertical addition problem, students are taught to think, "100 + 100 + 100 –

$$3 = 300 - 3 = 297."$$

VERBAL

Language is used as an integral part of the program. Students are taught the meaning of root words in the mathematics context. Students are also taught how to explain their thought process and reasoning verbally.

VISUAL

Meaningful pictures, charts, and tables are used to explain ideas and concepts. Many of the problems in the workbooks are "pictured-based," providing students with insights into problems that transcend the written words.

PROGRAM DESCRIPTION

MMSC Day School, a private school in the Maple Leaf neighborhood, will be opening its doors to our neighbors to provide SES services. Our program will use material and instruction that matches with the state's reading and math standards, preparing our students for success in school and beyond.

All staff are highly qualified professional educators. We believe that teachers as well as students are learners so our teachers are continually learning and growing professionally to meet the needs of our ever-changing student population.

Instruction in reading and math is available for grades kindergarten to 12 after school

Collaboration with the student's school and family as well as assessments are essential to determine the level and kind of instruction needed for each student. Timelines are set up to best monitor student academic growth and there is frequent communication with parents/guardians to ensure that students' needs are being met. Through our emphasis on collaboration with students' schools, we are able to focus our instruction on what is being taught in the student's classroom to add greater understanding. We use materials that complement the state testing expectations so that students will have the competence and confidence to be successful.

PROGRAM DESCRIPTION

We at Mobile Minds Tutoring are dedicated to our mission of teaching students how to become successful learners. We are committed to providing the highest quality educational experience by creating an individualized, innovative tutoring program for every child.

We believe that every child has a unique learning style. Identifying the way a student learns and teaching them how to use their unique abilities and talents ensures that they will become successful in every aspect of their life. Our tutors therefore design lessons that are engaging, varied, and focused on each student's academic goal. An educator who teaches a student how to learn provides that student with the lifelong learning skills needed to achieve academic and personal success.

Mobile Minds uses innovation and professionalism in our approach to education. We hire only the highest qualified and certified teachers, professors, and subject professionals. Focused math/reading instruction through small groups or one-on-one provides students with the tools they need to achieve their academic and personal goals.

Mobile Minds Tutoring is geared towards helping students in grades K-12 achieve success in either mathematics or reading. Every child has the right to quality education, and it is the priority of our staff to ensure each student feels safe and successful during each tutoring session.

Fax: 360 983 8190

Email: rtorrey@mossyrock.k12.wa.us

Districts: Mossyrock School District

PROGRAM DESCRIPTION

The SES program provided at Mossyrock Elementary will focus on meeting the needs of each individual student in the areas of mathematics and/or reading. The program will provide one-on-one or small group intervention services for students who need additional assistance to help them obtain the knowledge and skills to pass the state assessment, the MSP, at grade level. The instructors will start by using a diagnostic assessment to determine each student's strengths and weaknesses. The results from other assessments such as the MSP, MAPs, DIBELS, and easyCBMs will also be used in identifying student weaknesses. Once the instructors identify student weaknesses, they will use research-based materials and strategies to teach the students specific skills or concepts. The instructors will focus on gaps in the students' learning and will provide intense intervention in these areas. All curriculum and materials used in the process are aligned with the state grade level expectations (GLEs). The goal of the program is to have each student meet or exceed his/her grade level expectations by the end of the service. If a student is several grade levels behind his/her peers, the goal would be to grow by more than one grade level.

PROGRAM DESCRIPTION

What is MYEQ?

Emotional Quotient or Intelligence (“EQ”) is the ability to be smart with ones feelings and emotions and it's the foundation for healthy, sustainable relationships.

MYEQ is a 501c3 non profit alternative program that provides supplemental education, mentoring and wraparound services for inner city youth and their families.

Participants work with MYEQ Coaches to develop an educational plan tailored to meet their specific needs. MYEQ staff has established routines that are predictable, consistent and in line with Washington State Standards. Our goal is to ensure each participant exits our program on-or-above grade level.

MYEQ Coaches help participants develop their ability to make learning fun and innovative. We guide them through their development process in a way that is safe, culturally competent, nonjudgmental and self-reflective. We assist youth in strengthening their emotional intelligence (EQ) so they are better equipped to respond to their day-to-day social and academic challenges. We maintain an inclusive environment that encourages self-efficacy, self-expression and relationship-building. Our coaches are well trained facilitators who are excellent at trust-building and have in depth core subject knowledge in reading, math and interpersonal communications.

MYEQ is a part of the REACH/Goodwill Partnership. Our collaborative efforts allow us to provide a variety of wraparound services for families. Through our partnership we are able to provide in-house services such as vocational training, G.E.D. preparation, high school completion, college bridging, internships, employment opportunities and a number of career development and life skills classes for youth and parents.

PROGRAM DESCRIPTION

The National Lighthouse Foundation's Math and Reading Wizards Program is a supplemental educational program focused on mastery in the content areas of Math, Reading, and Language Arts.

Math & Reading Wizards is a high quality program based on years of research, designed primarily to increase overall student academic achievement on state standards. The program is based on the use of worksheets that incorporates basic math and reading techniques. Within the programs 9+ years of tutorial experience it has maintained a minimum of a 95% proven effective rate in helping target student populations improve academic achievement. By building upon the foundation established in schools, we are able to utilize repetition and basic conceptualization techniques that can be transferred into one and a half hour sessions, twice a week, immediately after school. Each student is given an initial assessment test in both math and reading. The student's achievement goal is tailored according to his/her assessment scores. The Math and Reading Wizards program is available for grades K-12, and the services are provided in local schools and community centers.

PROGRAM DESCRIPTION

Neighborhood House Tutoring and Resources Centers are established, culturally competent and academically effective programs for children and youth. We have three centers conveniently located in West Seattle, White Center and Burndale Homes in Auburn.

We provide a positive and fun environment offering after school and full day summer programming to youth in grades K-12. Our tutoring staff is caring, experienced and motivated. Individualized services will meet expected outcomes for each student. Assisted reading and math activities are woven into each session, and a project-based learning approach is used frequently. Social and recreational activities are included periodically to form a sense of community, improve youth engagement in learning, and generally address the developmental needs of participating youth.

Student learning goals are set and monitored on a regular basis. We expect and facilitate monthly communication with parents and schools. Parents have regular opportunities to check in with the tutoring staff when they pick up and drop off their children. Parents will receive a quarterly report on the progress of their child, including strategies they can consider at home to support their child's academic success. Our program coordinators are accessible by phone or email to communicate with parents, and make efforts to inform parents of changes to our services or challenges to progress with their child. Non-English support in multiple languages is available for parent communication, based on need.

Our activities are enrollment-based, and we look for a commitment by students and families to attend full sessions at least twice per week.

Low-income students may continue after SES services are finished.

PROGRAM DESCRIPTION

The Learning Clinic at Neuroeducation is based on the belief that each of us has a different way of learning because our brains are wired differently. These subtle neuro-developmental variations can greatly affect how productive we are in the learning process. In addition, learning is profoundly influenced by social, emotional and behavioral factors. Therefore, if the learning process is to be truly effective, the teaching process needs to be individualized rather than conducted in a standardized way, thereby taking into account the remarkable diversity of the mind. Frequently, when this individualization does not occur, the result is undue frustration and consequent failure with learning.

For many individuals, frustration with the learning process is compounded even further by the existence of a learning disability. Unfortunately, these learning disabilities are typically misunderstood and go undetected by both parents and/or teachers. When school becomes a struggle, the admonition to just "try harder" doesn't work. It's almost never an issue of laziness or lack of motivation, but rather the result of extreme frustration and fatigue associated with recurring failure. At The Learning Clinic we match our tutoring to how the child learns, resulting in remarkable success stories

PROGRAM DESCRIPTION

Northwest Community Action Center (NCAC), division of YVFWC provides Supplemental Education Services (SES) for eligible students residing in the lower Yakima Valley. The SES is available for reading and math at many of our 21st Century Community Learning Centers located in the lower Yakima Valley. Instruction will be provided by certified instructional staff during center hours of operation which are generally Monday-Thursday from 3:00-5:00 PM for eligible students grades K-12.

Instructors assess student baseline reading and math levels through district administered testing, such as MAPS, DIBELS, or Stars scores. Learning goals are created by the instructor in collaboration with the student, parent/guardian, and school district staff. Ongoing academic progress is monitored to ensure adequate progress is achieved. Academic materials used support Washington Learning Goals, Essential Academic Learning Requirements and Grade Level Expectations. Reading curriculums support phonemic awareness, phonics, fluency, vocabulary, and text comprehension. Mathematic curriculums support understanding mathematics, computing fluency, applying concepts to solve problems, reasoning logically, and engaging in mathematics.

Northwest Community Action Center will provide Supplemental Education Services at a cost of \$45.00 per hour per student. This cost includes the following expenses: personnel, personnel benefits, educational materials, supplies, transportation, facility usage, professional development, and administrative costs.

PROGRAM DESCRIPTION

ALL SERVICES PROVIDED BY WASHINGTON STATE CERTIFIED TEACHER, MARAGRET KULKIN.

Students at Northwest K-8 Learning Support benefit from teaching that is guided by focused, concentrated, and intensive instruction. Time is taken during each tutoring session for students to ask and respond to questions, problem solve, and express individual ideas about how to arrive at answers.

Periodic assessments (curriculum based measurements) are used as tools to evaluate the challenges or gaps in understanding that can make learning difficult or frustrating. Diagnostic assessments are used along with more informal progress-monitoring to provide critical feedback about skill level.

The information gained from test data and input from students, families, and teachers will be used to develop goals and areas to target instruction.

Services provided by Northwest K-8 Learning Support include: helping students with language delays, learning disabilities, or special needs. All skills are taught at a manageable pace, and if necessary, lessons can include additional instruction on English usage, spelling, and vocabulary.

Depending on student need, reading instruction focuses on phonics, phonemic awareness, vocabulary, fluency, and comprehension. High-interest passages are used during tutoring sessions in both fiction and non-fiction. Students are encouraged to find meaningful ways to connect with what they read, sharing personal background knowledge on a particular subject, or a connection with a particular situation, character or event.

Math instruction includes teaching strategies for practicing math facts, problem solving, and understanding mathematical procedures and concepts. Northwest K-8 Learning Support uses math games and standard math models (base-10 blocks, counters, graphs, fractions tiles) to provide hands-on experience with math concepts and the different ways to represent them.

Northwest K-8 Learning Support, Inc. encourages communication with families. Northwest K-8 Learning Support utilizes The Refugee and Immigrant Forum of Snohomish County to translate progress reports or goals for families that request it.

PROGRAM DESCRIPTION

The Northwest Learning and Achievement Group's CAD*LAC (Centro de Aprendizaje y Desarrollo/Learning and Achievement Center) will serve SES-eligible students through parent request from eligible schools in ESD Regions 105, 133, 171 providing tailored tutoring services for students from grades 1st through 12th in individual or small group learning groups primarily in the content areas of math and English/Language arts. Other subjects can also be addressed. Tutoring will occur in the student's school building or local public access facility (library, community center) based on student need and facility availability as arranged in each individual district. The instructional support program for each CAD*LAC tutored student will be developed by NLA and qualified tutors using district assessments of student abilities (learning assessment tests), parent and teacher input. Tutoring materials will rely on texts and instructional materials used in the student's classroom; other supplemental materials will be Washington state standards-based or those used in the regular school day. Homework and project completion will draw from school-assigned materials. Tutors will be drawn from certificated and classified instructional staff, or trained college-educated tutors, including tutors who are proficient in Spanish or Russian/Ukrainian, depending on student need and district. Student progress in the tutoring sessions will be charted weekly with the tutor communicating regularly with both the student's teacher (s) and parents. Parents/guardians will receive updates on student progress at least monthly, and if requested or indicated, weekly. Parents can receive updates in Spanish and/or Russian/Ukrainian, on request.

PROGRAM DESCRIPTION

Othello Young Einstein's offers eligible K-6 students support in English language arts/reading and mathematics.

We offer tutoring services in the comfort and safety of the student's home school computer lab. We use Compass/Odysseyware software for students in grades K-6. Our tutoring service sites are monitored by a teacher certificated K-6 in Washington State.

Tutors monitor student progress and work with schools and classroom teachers to ensure student efforts in the program are helping them succeed in their regular classroom.

Students are assessed to determine their instructional level and learning objectives. Next, the curriculum is adjusted and set to provide activities at the appropriate level for each student. Students are encouraged to complete two one hour sessions per week.

Staff monitors student progress and follows-up with written communication to the student's parents every two weeks.

Communications will be provided in English or Spanish as requested. Phone calls to parents requesting Mixteco translation will be provided.

PROGRAM DESCRIPTION

The Tacoma/South Puget Sound Mathematics, Engineering and Science Achievement (TSPS MESA) "Rising Stars" tutoring program tutors students in mathematics, reading, organization and study skills. We are dedicated to teaching students the value of having an education. Our "Rising Stars" tutoring program is an effective way to help students reach their potential and obtain higher academic self esteem. Elementary, middle/junior and high school students are tutored by Pacific Lutheran University students (Mentor/Tutors) and certified teachers. Our Mentor/Tutors are proficient in mathematics and reading and meet with students for a series of individual tutoring or group tutoring sessions, depending on the request and availability of the parents. A learning environment is facilitated in which students are encouraged to become part of an "academic community."

What to Expect from TSPS MESA

- Tutors/teachers are carefully screened for their proficiency in mathematics and reading subjects. They are expected to develop personal relationships with the students as mentors
- Hands-On Instructional Methods: Our approach at MESA is a student will "learn mathematics and science by doing mathematics and science." We use this same exact approach during tutoring. A hands-on approach is used in teaching mathematics and reading along with other strategies.
- Student Development: Our tutors/teachers work on a student's academic confidence, study habits, critical thinking and problem solving along with improved homework completion and grades in mathematics and reading.
- Convenient Tutoring Locations: Tutoring can be held at Pacific Lutheran University's Mortvedt Library, local libraries near the student's home, and, upon request, at the student's school that he/she attends. We strive to have tutoring locations to be held at the most convenient location for the student and their family.

PROGRAM DESCRIPTION

Pierre's is a Multi-bilingual Tutoring and Mentoring agency (ELL&ESL)

We believe that all students can learn despite their language deficiencies and cultural heritage. Pierre's tutoring and mentoring offers one-on-one, group, on line and in home tutoring. Since, we are a Multi-bilingual agency; our staff speaks different languages to accommodate your child/children learning and language deficiencies.

Pierre's tutoring and mentoring agency offer tutoring in all subject areas such as Math, English, Science, Reading and Writing. We specialize in designing our curriculum and teachings around child/children native language, learning ability and age. Our reading program stresses reading fluency, phonemic, vocabulary and writing comprehension skills. This designed reading program will ensure that students will be able to read, comprehend what is read and also communicate in writing his/her understanding of what was read. Our math program is designed to develop student number logic, mastering numerical and comprehend apply concept to solve numerical problems. Because we are a multi-bilingual agency we also offer tutoring in the sciences, we anticipate that none English speaking students may participate in this tutoring session.

We believe that working together with Schools, Teachers, Parents, Colleges, Communities and Stake-holders would ensure that we are targeting your child/children learning deficiencies in the many subject areas. Pierre's also offer college visitation for students with parent authorization and support for families in need of assistance through community support agencies, this extended program will ensure that the entire family stay involve in their child/children learning growth.

PROGRAM DESCRIPTION

Powerful Schools is a literacy, arts, and after school non profit with over 18 years of experience helping struggling readers, expanding children's possibilities through writing, using arts in the student curriculum to reach non traditional learners, and offering a wide range of after school classes for students at their school. Our reading tutoring program serves as the foundation of Powerful Schools' literacy strategy. The program ensures that the lowest performing elementary readers are identified by their teachers, and provided with intensive individualized tutoring throughout the school year. We recruit and train tutors from the community to work individually with students on a daily basis, using a scientifically proven, field-tested curriculum to bring each student up to grade level within the school year. Over 85% of our students who are reading below grade level achieve grade level reading by the end of the year.

Powerful Schools Readers program also encourages family involvement through student progress reports and literacy nights. The literacy nights are free and they help families with basic at-home reading techniques, creative storytelling, literacy games, and an end-of-the-year celebration of student achievement. Our tutors and staff have decades of experience working with all students from various cultural and economic backgrounds.

PROGRAM DESCRIPTION

The Refugee Women's Alliance (ReWA) delivers culturally and linguistically appropriate core subjects tutoring, in individual and group instruction formats, to low-income refugee and immigrant students in King County. Through more than a decade of experience working with refugee and immigrant youth, we have developed program design and service delivery models that effectively address the needs of English Language Learners. In the 2009-10 school year, 97% of ReWA's Youth Program students matriculated to the next grade level, performing better academically and exhibiting the improved social skills that come with newfound self-confidence. In the 2009-10 school year, 97% of our students also improved their study skills, including increasing the number of completed homework assignments.

PROGRAM DESCRIPTION

RSD FOCUS program, serving Renton School District students, will meet for one hour after school on Tuesdays and Thursdays. Students may choose to receive assistance in reading or math. Instruction will occur in small groups of no more than six, sometimes services will be one-on-one. Tutoring sessions will align with what the student is working on in their classroom and will focus on the skills and content areas where students most need to improve. Students will use materials and curriculum that both supports their classroom work and growth towards meeting standard on specific reading and math standards. Students will receive this after school help from Renton School District teachers who understand what students are learning in their classroom, what they are supposed to learn, and the students' current skill level. These teachers will use their knowledge and expertise to accelerate each student's learning so they are able to perform at grade level.

PROGRAM DESCRIPTION

S & A Education & Tutoring provides tutoring services in the Puget Sound area to students in the K-12 grade level. Our program is designed to serve as a learning center focused on individualized and group settings. We contribute to the improved academic achievements of all students from different cultural backgrounds and diversities. We are finding and implementing ways to effectively change students learning behavior as part of the call for change and for struggling students succeed and compete. We will implement a good solid planning and creative thinking to reflect the tradition and commitment of communities with which we will interact. We will work with parents and teachers in order to enhance the learning ability of the student we serve.

Our program will include a research based curriculum that includes instructional strategies to improve the academic standing of any and all struggling students. We will provide highly qualified tutors who will focus to enhance the learning ability of students individually. We will also have group settings for students to interact with each other as part of their learning criteria.

Our program primarily focuses on students whose needs are not being met by the core academic program offered in the regular class room. We also do offer our own teaching methods that include assessments and tests to measure student's progress as we progress. As part of our commitment to communicate with parents, we provide services and interpretations in languages such Somali, Swahili and Amharic. S & A Education & Tutoring is committed to the safety and needs of all our students to create a positive experience for both students and their parents.

Districts: Seattle Public School District, Shoreline Public School District, Renton Public School District

PROGRAM DESCRIPTION

Our targeted group is the victim of many problems that others rarely face among these are, family related problems- neighborhood related problems- peer pressures of various kinds etc, and steps need to be taken to address them if the child is to continue and succeed in his /her education.

We need to help these kids at the time they are faltering by giving them support like tutoring- encouragement , provision of safe and comfortable classrooms and scholastic ambient, by being there to help them stay away from paths of least resistance and by giving them hope so that they can believe, respect and love themselves.

Salaam Urban Village has this at its primary objective. To help the children stay in school by helping them with their education and by giving them as much supplemental training as they need in order to catch up with their peers. We have the educational expertise and have decided to obtain educational materials from all over the world to accomplish this goal.

We will go to the extent of giving any student who needs it a one on one tutoring until he/she gets it. Our objective is to aggressively compete with the other less desirable temptations these kids are offered like quitting, joining other less salutary pursuits and by tailoring the training to the capacity and background of the child. We will stay with him/her until they get it and until they can run with herd. We want to make up for the handicap- whatever it is.

“Man is the supreme Talisman. Lack of a proper education has, however, deprived him of that which he inherently possess.....

Regard man as a mine rich in gems of inestimable value. Education can alone cause it to reveal its treasures , and enable mankind to benefit there from- (from Bahai Writings)

Districts: Seattle School District

PROGRAM DESCRIPTION

Seward Park Tutoring is a Saturday morning program that builds literacy and numeracy skills through hands on, engaging, and reflective exercises in writing, reading, and math. All students are welcome as teachers are trained in English Language Learners and Special Education student needs. The small group SES program spans 5 consecutive Saturdays and runs from 8am to 1pm. Four sets of 5 sessions will be scheduled starting in February and running through June. A student may sign up for one of the sessions for a total of 25 hours. Make ups for missed sessions will be scheduled on an individual basis.

Skagit County Community Action Agency

Contact: Melanie Coyne

Address: 330 Pacific Place
Mount Vernon WA 98273

Served: District

Phone: 360-588-5733

Fax: 360-416-7599

Email: melaniec@skagitcap.org

Districts: Mount Vernon School District, Burlington Edison School District

PROGRAM DESCRIPTION

Skagit Literacy is a program of the Literacy department of Community Action Agency. Local teachers use research based programs and

strategies that are aligned with the Washington State Essential Academic Learning Requirements (EALRs) for language arts and math to help students gain confidence in their abilities as students and succeed in passing all required examinations. These certified local teachers and supervised bilingual paraprofessionals will provide instruction that aligns with the child's school district's adopted math and language arts curriculum and instructional materials. Using ongoing assessments and consultation with the classroom teacher, Skagit Literacy will identify an accurate picture of student needs and direct instruction to specific areas targeted for improvement.

Students will benefit from this opportunity to receive assistance after school. Students may work one on one with a teacher or in small groups.

Communication with the home will be provided in languages other than English when necessary. Families will play an important role in helping design the program so both home and school are working toward the same goal. In addition to tutoring for the children, Skagit Literacy provides coaching for parents on techniques to use to support their children's accelerated achievement. When a student enrolls, a teacher will meet with that student and his/her parents/guardians to create a plan for achievement. The goals on the achievement plan will be monitored bi-weekly and progress reports shared with parents. This plan includes the role of the parent in supporting their child's achievement. By focusing on parents' strengths, the whole family is enriched as the literacy and numeracy confidence and positive practices in the home grow and develop.

PROGRAM DESCRIPTION

Our K-12 academic program utilizes state and district standards in daily instruction and expects academic accountability on behalf of all members involved: parents, students, teachers, and administrators.

Our goal is for each student to perform at 80% or better in academic achievement. Reading, Writing and Math skills are emphasized with the understanding that mastery of these skills will positively impact all other content areas of study.

Teachers use WA State EALR's/Standards to monitor student progress.

Data driven instruction is used to plan all lessons. Data is derived from students WASL scores, teacher/student/parent input, student report cards, or quarterly progress reports.

Teaching methods and curriculum are based on successful Research Based practices and include: Differentiated Instruction, Reading Mastery, Corrective Reading Direct Instruction, Individualized and Small Group.

Curriculum is also researched based and are proven to have results with reluctant/struggling learners. We use the following educational materials: Saxon Math, AGS textbooks, Renaissance Reading products such as Accelerated Reader and Math, SRA – Open Court Reading Series,

Instruction is based on individual student needs and may include Distance/On-line classes, traditional textbook assignments, or project based courses. Bilingual Instruction or ESL is available for students whose first language is not English.

Students, enrolled in our program, will have the following requirements:

- An Individualized Academic Plan that describes classes, assignments, tests, and grading.
- Goal oriented lessons and assignments; students must complete studies by agreed time lines.
- Parent involvement. Parent will sign a parent contract agreement that indicates: a parent or guardian must be present during all academic discussions or conferences with the student and meet or speak with instructor on a monthly basis for review of academic progress
- Intervention Plan – if student is not making academic progress, an intervention plan will be developed in which areas of concern are identified; plan describes how student will be served to improve academic performance.

PROGRAM DESCRIPTION

SOL provides our students and families a unique learning experience that is individualized, culturally competent and linguistically appropriate. SOL proudly provides our services in English, Spanish, and Russian to our families. SOL utilizes the Reading and Math Grade Level Expectation's as the framework to instruct our students. Reading is instructed using a Balanced Literacy Approach focusing on Fluency, Phonemic Awareness and Comprehension and a Basic Math Approach focusing on Calculations, Fluency and Applied Problems in content areas such as place value and basic number skills; decimals, fractions, and other rational numbers; ratios, rates, and percentages; expressions and equations; measurement and geometry.

Pre and Post assessments are completed using the Woodcock Johnson III Test of Achievement and the Bateria de Aprovechamiento by Riverside Publishing Company to create our student goals and to monitor progress. Goals and objectives are shared with the parents at the start of tutoring, weekly up-dates, a Mid-Progress report and a Final Report are provided to our Parents to keep them informed. Making solid diagnoses, prescriptions, teaching, reassessing, and reteaching are utilized in order to obtain the best outcomes from our students. Students not making adequate progress toward their goal(s) are recommended for intensive one on one tutoring. SOL Assisting Our Youth Reach Their Full Potential! Join us!

SOL proporciona a nuestros estudiantes y sus familias una experiencia de aprendizaje único individualizado, culturalmente y lingüísticamente apropiado. SOL ofrece con orgullo nuestros servicios en inglés, español y ruso a nuestras familias. ¡SOL Ayudando A Nuestra Juventud Alcanzar su Máxima Potencia!

PROGRAM DESCRIPTION

Somali Youth & Family Club is a 501(c)3 non profit organization offering a dynamic after school program serving the refugee and low-income students in the Skyway and Renton areas of King County. We recognize the importance of meeting the unique needs of the refugee community such as parent engagement, cultural understanding, learning the English language, and bridging educational gaps. We employ multi-lingual staff with many years of international and US teaching experience that delivers high-quality tutoring and teaching with their native languages of Somali, Swahili, Amharic, and Arabic. We tutor refugee children with positive, measurable results in student learning skills, academic grades and graduation rates.

We are devoted to maximizing the learning experience of every child by guiding and challenging them to reach their fullest potential through community networking and our challenging and inspiring programs. We are committed to building leaders and promoting productive participants in an increasingly diverse society by providing the opportunities, resources, and skills necessary to be life long learners. SYFC strongly believes that the protection and educational development of all youth, and the access to resources for families, is necessary and integral to human progress. We are committed to working with all partners to provide access to services towards the attainment of sustainable quality of life.

SYFC has four major focus areas: Education, Parenting, Recreation, and Social Services. Our Education Program includes after-school tutoring, Parent/Child Early Learning Project, and Youth Leadership Initiatives. The Parenting program offers classes, workshops and access to resources for families with growing needs. The Recreation program includes soccer, basketball, and field trips. Our last program concentrates on social services; including Landlord Liaison Project, benefits assistance, citizenship and advocacy. Our partners are many and include Child Resource of King County, Renton School District, Renton Technical College, School's Out Washington, Starfire Soccer, and DSHS CPS Region 4.

Districts: Kent, Federal Way, Highline, and Auburn School Districts

PROGRAM DESCRIPTION

At the AAA Education Center, St. Columba's Episcopal Church, the certificated teacher will provide after school classroom instruction to students in math, reading and writing. The paramount focus is for students to increase their basic skills, specifically so they can pass the Measurements of Student Progress (MSP) and eventually pass the High School Proficiency Exam (HSPE). Students will improve their SAT/ACT scores. We will collaborate with the Education Access Network, the school districts, and the Office of the Superintendent of Instruction(OSPI). Standard test preparation and instruction will be available.

PROGRAM DESCRIPTION

For only minutes a day, your child will reach full academic potential, feel confident, and sustain a natural love for learning.

The Benefits of Engaging a Learning Coach:

Assessments:

- Your child's specific needs are identified.
- Teaching your child, not the curriculum.
- Ensuring an effective use of learning time.

Learning:

- Age-appropriate, child-friendly learning tasks.
- Tailored to meet your child's individual needs.
- Repairing the damaged of hurtful learning experiences.

Results:

- Secure confidence knowing your child is academically well prepared.
- Adding the reality of stress free learning to all the other many benefits of home-schooling and professional academic coaching.
- More time to explore other things that enjoy as a family.

Testimonies...

"Ms. Somero is able to wrap learning, respect, and fun into one package and make it accessible to her students. Jennifer H.

"An incredible skill at challenging my daughter yet not frustrating her...was able to take (J) to a level in her reading beyond her years... a strong teacher with a rare passion for loving and caring for children." Rachelle R. MS CCC SLP

"I can wholeheartedly recommend Mary, her style is lively, respectful, fun, focused, and gentle...attuned to the unique qualities and needs of each child... highly qualified and has a natural gift for teaching kids. She is a very pleasant person and we love having her come to our home." Susan B.

"She has a real heart for reaching the children bringing out their best." Connie S.

Secure your child's academic confidence and future advantage today.

PROGRAM DESCRIPTION

We at Stroud Educational believe that a quality education is a right and not a privilege, and should be available to every person on this planet. We also believe that every child deserves respect, time, and individual attention, and that every family should expect only excellence from their schools and teachers. Students learn best when they feel safe, secure, and confident, so tutoring may happen in home, at school, or where ever it works best for students and their families.. Robin Stroud has a Master's Degree in Education and over 20 years experience helping people of all ages reach their educational goals. She believes that parents and family are an important part of the educational process, with mutual cooperation and respect between school and family being the best way to ensure academic success for all. Through a series of formal and informal assessments based on observation, performance, attitude, and motivation, Stroud Educational tailors curriculum to a student's level of understanding and ability. In addition to the latest research-driven assessment tools, our tutors help students to:

- *Plan and study, think clearly and use logic
- *Sift evidence and weigh arguments
- *Be better readers, writers, spellers, speakers
- *Solve math problems, and conquer their math phobias
- *Learn the secrets to excelling in school
- *Know how to analyze data
- *Practice successful student skills

It is possible to learn the skills to be successful in school and in life, and often struggling students just need the extra boost that comes from individualized tutoring. Let us help your student reach their educational goals. Call us to arrange the best time and place to talk about new strategies, new goals, and new successes in school and at home. Our future depends on it.

Districts: Seattle SD, Kent SD, Highline SD

PROGRAM DESCRIPTION

Our program is based upon a comprehensive assessment of community inputs. We will assess our students via standard test, teacher evaluations, we will utilize observation and evaluation of strengths and weakness and access parent inputs. Once we identify knowledge gaps, we will focus on strengthening the gaps to bridge the level of learning to the next level. We are not a homework club. Succinct tutoring is committed to improving the academic performance of all students. We provide activities that increase literacy skills, math skills, reading skills and include ESL instruction, we have experience working with students with IEP's. We consult with our teacher partnerships utilizing recommendations of materials that will enhance and compliment in-class learning and empower students to raise confidence and self-esteem. Our program goals are to raise student grades and have them become successful by tapping into the entire community for support.

Our system of Student progression and Assessments include, teacher report cards, teacher progress reports, teacher observation and grade level assessment from teachers, Parent input through one on one meetings, parent conferences and group sessions. School district grades, Succinct tutoring pre-test, mid-term test and final exams. Consistent communication is the key for our student's success. Communication includes but not limited to one on one with Teachers, student's family and others who help support that child.

Our students will understand and use different skills and strategies to acquire math and reading skills. Using word recognition skills and strategies to read and comprehend text. We will use dictionaries, thesauruses, and glossaries to find or confirm word meanings, pronunciations, syllabication, synonyms, antonyms, and parts of speech of words.

Math strategies include but not limited to students putting together and taking apart whole numbers. Quickly recall multiplication facts through 10 X 10 and the related division facts.

PROGRAM DESCRIPTION

This program serves students in reading and mathematics. Specific student populations served are low-income, minority, migrant, limited English proficient and students with disabilities. Services are provided on-site, at the student's school, or on-line. Individual tutorial sessions or small group instruction will be utilized to increase student achievement. Prior to beginning the tutorial program, a District SES Coordinator and tutor will meet with parent(s), school representative(s) and student to discuss the student's academic performance. A detailed instructional plan, including scientifically based research strategies in reading and mathematics, will be created defining the goals and objectives based on the needs of the student. Curriculum will be aligned to the state standards and will be an extension of the school district's instructional programs. A standardized assessment will be administered prior to the beginning of tutoring to determine areas of strength and weakness and at the end to evaluate progress. A continuous collaboration with school/district staff and parents is an essential component of this program.

PROGRAM DESCRIPTION

Sunnyside's Promise is offering after school, weekend, and summer instruction for students that are not meeting Washington's Essential Academic Learning Requirements in Reading, Writing, and Mathematics. Sunnyside's Promise Staff works closely with students, parents/guardians, and school staff to ensure the best and most effective individual education plan is created and followed. We strive for our curriculum to match that of the classroom in which the student is struggling and try to integrate our students back into their normal classes as quickly as possible.

Progress report meetings are regularly held with appropriate school staff to ensure open communication and that our students are served to the best of our capabilities. Parents/Guardians are invited to every progress report meeting and are encouraged to come and check on their student's progress whenever they are available. Spanish/English translation is available for all parent meetings. All material sent to families is also available Spanish/English.

PROGRAM DESCRIPTION

Sylvan Learning Center's "Ace it! Tutoring" program focuses on teaching the core reading and math skills that have the greatest impact on your child's success. We assess your child's skills to ensure that he/she immediately begins building the foundation needed to rapidly improve performance in school and on standardized tests. Results of our Pre, Mid and Post Assessments are shared with parents and school teachers. Sylvan teaches in small classes- six students or less- so your child benefits from working within a group and receives plenty of personal attention from the Sylvan "Ace it!" teacher. Our teachers are highly qualified and know how to motivate students. They provide a balance of guided group and partner instruction as well as on-on-one instruction and opportunities for students to work independently. "Ace it! Tutoring" Sessions are conveniently held after school, at your child's school. Sylvan communicates effectively and regularly with students, parents and classroom teachers so that everyone is informed and involved. For their consistent attendance and hard work, students are rewarded with increased performance in the classroom and more confidence on standardized tests. As an SES provider for more than five years, Sylvan Learning Center has repeatedly demonstrated the ability to help students reach their goals.

PROGRAM DESCRIPTION

Sylvan is the world's premier brand in tutoring. Founded over 30 years ago in the Pacific Northwest, Sylvan programs have helped thousands of students reach their academic goals. Students in Sylvan Academic Reading and Sylvan Math Programs gain an average of one year's growth in only 36 hours of tutoring.

It's a combination that works. We start with a skill assessment to identify your child's specific skill gaps and then develop a program to best fit your child's needs. We have a strong motivation program and have highly trained and certified teachers.

Our Sylvan Learning Centers are filled with the very latest educational materials and text books proven to help children succeed. All of our Sylvan teachers and Educational Directors are certified teachers. When you come to Sylvan, you have an entire team of highly trained and motivated educators available for you and your child!

It's no wonder that more teachers and principals bring their own children to Sylvan Learning more than any other tutoring program! You will have the option of bringing your child to a Sylvan Learning Center in your neighborhood.

Locally owned and operated by families who live in your area, you can feel confident that you and your child will be given the very best customer service. We value your business tremendously and will provide excellent communication regarding our programs and your child's progress. We are here to provide the highest quality program and customer service for you and your child, and celebrate the success that comes with achievement. We look forward to working with you!

PROGRAM DESCRIPTION

Serving SEATTLE, HIGHLINE and TUKWILA families for 28 years, we are locally owned and family operated. Our warm and caring tutors tailor individualized learning plans that build the skills and attitudes students need to succeed in school. No Child Left Behind (SES) tutoring is available in MATH or READING through AFTER SCHOOL PROGRAMS delivered at participating schools. Call us for details about your child's program today!

Our Math programs are FUN and EFFECTIVE for your student.

- Our personalized approach builds a strong math foundation.
- Our in-depth assessment helps us target the exact skills your child is missing, so we can create a personalized math program that delivers results.
- We decrease the time spent on homework each night by making your child more accurate with math facts.
- We bring math to life, make problem solving easier, and increase your child's competencies through the use of manipulatives.
- We measure progress every step of the way and won't move forward until your child has completely mastered each skill.
- Our math programs align with Principles and Standards for School Mathematics, developed by the National Council of Teachers of Mathematics.

READING: Sylvan will make reading easier and more fun for your child.

- Our in-depth assessment helps us target the exact skills your child is missing, so we can tailor a personalized reading program that delivers results.
- Our approach to reading ensures mastery of phonemic awareness, phonics, fluency, vocabulary, and comprehension.
- Dedicated reading tutors are trained and certified, care about helping your child build the reading skills he needs.
- Our reading programs are developed using scientific research and education industry best practices consistent with the findings of the National Reading Panel.

PROGRAM DESCRIPTION

Tacoma SES, serving Tacoma Public School (TPS) students, will offer individualized academic support to your student in the area of reading and/or math. These small group tutoring sessions will be provided after school by highly qualified staff who will work collaboratively with your child's classroom teacher(s). Our tutoring sessions will take place at your child's school and will focus on state standards and the TPS curriculum. A learning plan will be created at the beginning of the tutoring services and will be based on your child's needs. Tacoma SES teachers will use this learning plan and current student data to customize instruction to meet the academic needs of your child. This will ensure that a seamless coordinated program will be provided. Your child's progress will be communicated on a regular basis in order to support the best program possible for your child.

PROGRAM DESCRIPTION

This program serves students in mathematics and reading. I have been a provider for five years. I am a retired Washington State teacher and substitute in the Tacoma School District with knowledge and experience in teaching reading and mathematics to students from diverse cultures, languages, and incomes. At our initial meeting with your child, you and I will determine the mathematics and/or reading needs and concerns of your child. Learning goals are established in partnership with you, your child, and your child's teacher to assist your child to meet the Washington State Essential Academic Learning Requirements. There is an emphasis on required words read per minute and comprehension for each grade level which this program provides. Graphs will be used to record timings to monitor the progress. In Mathematics, there is a concern about students knowing basic math facts and strategies to explain mathematical thinking. This program provides opportunity for your child to develop and increase confidence in reading and math. Services are provided at the provider's location after school hours, inter sessions and summer.

PROGRAM DESCRIPTION

Teacher's Tutorials (T2) is a tutoring company run and built by public teachers. T2 only uses certificated teachers. We assign just one student to a teacher. We teach one on one. We work closely with schools. We have families. We have taught over 1,000 students.

We have had unusual success. We have had a ninety percent (90%) passage rate in math; and higher (100%) in reading. Source: Tacoma Assessment Database.

PROGRAM DESCRIPTION

As schools continue to struggle to classify the growing individual diversity of students, there's an emerging need to supplement efforts to learn more about how to serve these students – often described in ethnic terms - who experience multicultural diversity on an individual basis. Due to their ontological / way of being, these students must function as autodidactic / self-learners in classroom settings because they engage cognition (thinking) from a different perspective than the current prevailing pedagogical perspective of cognition as executive function. Clearly, there is a disconnect between the way these students internalize knowledge and information and how that knowledge and information is presented to them: they struggle to internalize essential academic learning requirements successfully but are hindered by the dis-equilibrating gaps and stresses of the disconnection.

For filling in the gaps and finding the missing links, Access Change Technologies LLC proposes to provide tutorials contextualized in an environment of interdisciplinary studies. Interdisciplinary fields cross general traditional curriculum boundaries between and among academic disciplines. In this context of interdisciplinarity, we will tutor students in the Washington State's Essential Academic Learning Requirements (EALRS) components that the Washington Assessment of Student Learning (WASL) requires in the components of Reading, Writing, Mathematics, Communication, Science, The Arts, Social Studies, and Health and Fitness.

Prior to enrolling student for tutorial services, we will meet with the parents/guardians and students. Together we will create an academic enhancement plan that engages all parties. A commitment from student will be sought to attend and be productive (on-time/on-task) and a commitment from parents/guardians to be involved and supportive. In developing this plan, we will coordinate with the respective school district and incorporate information and material that is made available. We will maintain contact with the parents/guardians by phone and in person to share information about the students' progress.

PROGRAM DESCRIPTION

The Right Prep is an approved SES provider in Louisiana, Pennsylvania and Washington DC. Founded in 2006, the goal is quality educational programs that help prepare children for success in the classroom and for the future. Through the online program, Apangea Math, students complete math tutoring at their own pace, and the program has a tiered "help" system for additional support when needed. Laptop and a prepaid wireless Internet card are provided. Both of these items are locked and can only be used to access the tutoring materials. The Wireless card must be returned at the end of the program, but families may keep the computers and will be given codes to release locks once Internet cards have been returned.

Students take assessments, which helps identify learning needs. Assessments, other instruction plans, and suggestions by teacher and parents help prepare an individualized learning plan. This plan will identify needs; create measurable goals, and a timetable for the student.

Apangea Math is built upon a study over ten years and is designed around instruction systems supported by empirical learning theories that teach skills and subject matter. The product has a strong record of effectiveness across the country.

Apangea is explicitly aligned with the Washington Essential Academic Learning Requirements (WEALR). After each lesson, program administrators determine if the skill has been mastered or if re-teaching needs to occur.

The program automatically tracks student progress and If a student seems to be having difficulty with a section, the program generates more information for that section.

All given text in the program can be translated into 8 different languages: English, Spanish, Portuguese, French, German, Mandarin, Japanese and Korean.

The Right Prep stays connected with schools and parents/guardians through the whole process and uses software for translating information into non-English languages for families as required.

PROGRAM DESCRIPTION

The Salvation Army Seattle White Center provides one-on-one and small group tutoring sessions after school hours at our facility located on 9050 16th Ave SW in Seattle. Our services are easily accessible by public transportation and van pick up at Highland Park Elementary School. Tutoring is available Monday thru Thursday from 3 pm to 6 pm. The Salvation Army provides scientifically based research curriculum to all K-12 students in reading, writing and math. Our tutoring sessions begin with learning objectives and are designed around learning styles while providing differentiated instruction. Our enrichment activities help to develop learning skills, a desire for learning, and effective study skills.

Tutoring sessions take place one to three times per week. Parents may choose days between Monday and Thursday and times between 3 pm to 6 pm. Tutors will work to schedule learning sessions for their child. All small-group tutoring sessions consist of no more than six students per instructor and students are grouped by age and academic need. The Salvation Army tutors are chosen for their skills in promoting academic excellence, instructing in scientifically based research and positive attitudes toward learning. Our tutors are current college students or graduates with an AA or BA. For more info go to <http://salvationarmyswc.org/youth-services/homework-center>.

PROGRAM DESCRIPTION

The Tutoring Center Federal Way provides individualized, one-to-one instruction in reading, writing, and math for students in grades Pre-K to 12. We use our FREE diagnostic assessment, along with input from the parent, to customize our tutoring programs for each individual student. We use our innovative Rotational Approach to Learning™ to increase academic skills as well as attention span, concentration, and focus. For parents, we provide monthly communication so you always know exactly how far your child is progressing. We do NOT require long term contracts...our services are provided on a month to month basis and our tuition is affordable.

PROGRAM DESCRIPTION

At Tutoring Club, our goal is to bring each student to the desired academic level as quickly as possible. In order to help your child succeed, he or she will receive their individualized program and instruction from our staff of professional tutors. We work to reduce stress and build confidence by starting each student at a level that he or she can handle and then progress through the grade levels as rapidly as they can. We are committed to helping students succeed in their education. We specialize in reading, math (from the basics through calculus), writing, study skills and SAT preparation. We use the most advanced curriculum in tutoring combined with a positive learning environment resulting in more learning per hour. We maintain low student to tutor ratios so every student receives a wealth of individualized instruction from qualified tutors who are committed to your child's success. Tutoring Club tutors strive to pinpoint problems and track required skills to correct them. Tutoring Club tutors work with your child's classroom teacher(s) to ensure success at school. Parents and tutors are partners in each child's success. Regular conferences keep you informed of your child's progress.

PROGRAM DESCRIPTION

The Way Out (TWO) provides tutoring, homework help, snacks, and activities to maximize the student's success in meeting and exceeding the state's standard at their grade level. This will be accomplished in the subjects of reading, math, and general studies as an extension to the school district's instructional program. The sessions will be before or after regular school hours or in the summer, on school site or close to the school, in a fun but structured setting that will allow the child to get the extra help they need in their area of focus. We will provide services to the children in person, and/or online based on the request of the family. Our experienced and professional staff will communicate with parents and teachers to assess and monitor progress using scientifically based research findings. Our online math and reading program will help students pass the State's Standardized testing. We are culturally sensitive to the needs of our students and can provide help in other languages such as Samoan, Spanish, Somali, and Swahili. Extra activities and awards will be based on student's attendance, participation, and attaining of goals. Other family members may be able to receive homework help. There must be a minimum of 2 per district to provide services. Supplemental Educational Services hourly rate for instruction is \$60 per person.

Districts: Seattle, Tukwila

PROGRAM DESCRIPTION

Since 1969, Tiny Tots Development Center (TTDC) of South Seattle has provided licensed childcare, after-school care, and early education services for low-to-middle-income children from birth to age 12. Services provided include free, sliding scale, and fee-based preschool, infant care, and before and after-school care for school-aged children.

Our Community Learning Center (CLC) after-school programs are some of the most successful in the city. We're ready to reach out to as many families as possible to help increase the academic performance of students. By spring 2009, 48% of students in our program who had never previously passed the WASL or DRA were able to meet standard. In the same time, 90% of the students in our programs reported that they felt better about themselves, make friends and better decisions; 87% reported they wanted to try harder in school.

We believe our success is due to our initiative to provide more opportunities for families to be involved in education. In a recent survey, parents feel welcome and comfortable and that their family values and customs are reflected in our programs.

PROGRAM DESCRIPTION

A Tree of Knowledge Educational Services (ATOK) exists to provide the finest quality tutoring for K-12 students. Our desire is to groom the character and learning abilities of our students in order to help them face and conquer the challenges of their educational career.

ATOK has successfully helped students achieve grade level proficiency for several years. Additionally, our students experienced a 1-2 grade level increase at the completion of our program. Our philosophy is that tutoring is used to accompany

the ability to learn. We believe in "completing the student" and by that, we are able to stay focused on our main goal, which is always student growth and achievement! We not only work with the students, but our tutors also arrange time to sit with parents and guardians to offer encouragement and guidance in how to best handle

their child's curriculum and areas of need. We succeed together by creating a healthy partnership in advancing academic standards.

PROGRAM DESCRIPTION

TutorCo provides LIVE 1-on-1 Online Tutoring for K-12 students in Math. Our customized program is proven to deliver academic achievement by enabling students to learn at their own pace. Our Tutors are highly qualified, motivated and committed to making a difference in your academic performance. Online Tutoring lets you study in the convenience of your own home all year round. Each 1 hour session is just like a private tutoring session. Our state-of-the-art technology ensures that the student and tutor talk to each other, and share an interactive white board, over the internet, just like if they were sitting next to each other.

We assign a counselor to each student who works with the family to set up the student for online tutoring. We provide a computer, and pay for High Speed Internet Access, for the duration of our program. Student can keep the computer when he completes our tutoring program. We consult with the parents, student and teachers, to assess the learning needs and style of a student. Then, we create a personalized learning program to improve student's Math grade and confidence.

More than 2000 students have successfully completed our tutoring program over the last 3 years. 95% of these students saw their math scores and grades improve. Our tutoring services are available Monday through Saturday, 9 am to 11 pm local time. Call us at (952) 960 2799 or visit us online at <http://www.tutorco.com>, for more information.

PROGRAM DESCRIPTION

TutoringOne effectively links the technology children crave with the instruction they need. The K-12 online mathematics and reading services are provided 24/7 in the convenience of the student's home. The assessment adapts to the skills and responses of the student to improve accuracy and reduce frustration. Just as no two people are the same; no two learning profiles are the same. All lessons are tailored specifically for the unique learning profile of each student.

The high-quality video lessons are student-friendly and align to state standards and most textbooks. The one-on-one videos correspond to daily classroom instruction to improve student achievement. The lessons include high-interest materials, models, real-world problems and age-appropriate games to engage and motivate students throughout the program. The self-paced lessons may be repeated as often as necessary without fear of embarrassment. Students should work on the program at least twice a week for one hour.

The programs have received awards and were recognized by the US Department of Education to be innovative and effective for diverse populations, slow readers, English learners, and special needs students. More than 10 case studies have proven the materials to be successful as well. In 2009-2010, parent surveys revealed 100% of our parents believe their child's attention, homework grades, and confidence had improved with our program. Eighty-six percent of parents stated their child's grades in math, attitudes toward math, and work efforts improved. Finally, 71% of parents reported their child's school attendance improved.

TutoringOne provides monthly reports to parents and the schools. Students will receive curriculum services until July 30th regardless of Title I allocations. Tutors have a BS/BA or MS/MA degree and are NCLB highly qualified. All instruction is in English, although additional support is available in Spanish.

If needed, parents are provided a company computer.

PROGRAM DESCRIPTION

TutorWorks has been an approved SES Provider for the state of California for the past 10 years. We have served over 130 different schools in Northern and Central California, serving over 1000 students each year. We have been invited to 92% of the schools that we have ever served. Additionally, TutorWorks is one of nine providers in the State of California (out of 185 approved providers) that received a designation by the State as a specialty provider to serve students with disabilities and English language learners. The designation was earned based on the program design and demonstrated results with students with disabilities and English learners.

We have developed our model for delivering high quality tutoring services based on 20 years of experience in the supplemental educational services field. TutorWorks offers skill building programs, one-on-one tutoring and group tutoring 2-5 days a week. TutorWorks time consists of 45-120 minutes of literacy or math reinforcement activities using our highly effective computer-aided curricula Explode the Code Online and Study Island. During this time, program staff acts as academic coaches, providing academic assistance, one-on-one tutoring and encouragement as needed. Credentialed teachers and motivational academic coaches support the students.

TutorWorks provides fun yet challenging curricula and a supportive classroom environment which nurtures a culture of success. Our program design allows student to continue to work on our software throughout the summer. Students will be provided with a laptop upon the completion of the tutoring program, which will allow them to continue working on the curricula. We believe that TutorWorks provides the strongest supplemental tutoring program available today. The learning environment we create is highly motivational and is maximized by using technology and a team-based approach. Our program works because we rigorously examine and improve them each year.

Email: opynda@gmail.com

Districts: Kent School District, Renton School District, Federal Way School District,
Auburn School District

PROGRAM DESCRIPTION

Tutoring Assistance Services (TAS) are designed to work with Ukrainian/Russian speaking refugee/immigrant students of King County, WA to help them meet Washington's Essential Academic Learning Requirements in reading and mathematics. We will serve Kindergarten through 12th grade students both individually and in small group settings. Our services will be offered after school, weekends, and during summer.

Our tutors once were refugee/immigrant students themselves who have successfully acquired English and have at least 2 years of college.

Our program's supervisory and direct staff members are trained and familiar with grade-level appropriate EALRs and, therefore, our curriculum is designed with the purpose of ensuring that each student is able to meet those requirements. Because of similar backgrounds and culture, our staff members are experienced in identifying areas of weakness of our students especially those affecting Ukrainian/Russian speaking students.

Our program uses diversity of instructional materials – including quiet drills, group work, and hands-on manipulatives, amongst other materials to ensure alignment in the teaching approach those of student's school. We will also provide parent and our program's staff meetings to help parents get familiar with school's expectations of their children and EALRs. We will continually report to parents on their children's progress and involve our parents in the decision making process of our program's design. We will also work closely with student's teacher(s) to report on student's progress and receive feedback.

PROGRAM DESCRIPTION

The Vietnamese Friendship Association (VFA), in partnership with the Secondary Bilingual Orientation Center (SBOC), holds a Saturday morning program designed to help students increase skills in math and literacy. The program is multi-lingual, multicultural, and all SES-eligible students are welcome. Students will engage in one hour of instruction in literacy, one hour in math. Active learning activities are incorporated at the end of the session to reinforce vocabulary and skills learned during the day. Students will not only increase academic proficiency in English and math, but will also develop self-confidence, cultural-competency, and teamwork. Students are taught in small groups with a ratio of no more than 1 instructor for every 6 students. Instructors are a combination of Seattle Public Schools' Instructional Assistants and VFA's background-checked and culturally competent volunteers and staff.

Location: Secondary Bilingual Orientation Center
301 21 Ave

PROGRAM DESCRIPTION

Jemtegaard Middle School's After School Program is a student-centered extended day learning program. Direct instruction will be provided in the areas of reading or math depending on the request of the parent. The program will operate three days per week for an hour, right after school each day. The program coordinator will develop an individual plan for each student in the program with input from the parent and the child's teachers. Instruction will be provided in small groups, no more than 3 students per instructor.

Reading instruction will focus on fluency, vocabulary, and comprehension. Mathematics instruction will target number sense and operations with a focus on vocabulary and concept and specific skill development. All instruction will be aligned to the instruction your child receives during the regular school day from his or her teachers.

To request this help for your child, please contact Washougal School District's Special Services Office.

PROGRAM DESCRIPTION

What sets Whole Systems apart is its RESULTS!! Whole Systems Learning students increase an average of MORE THAN THREE GRADE LEVELS in every subject area – reading, reading comprehension, math computation and applications. THIS SAME GRADE LEVEL INCREASE is achieved by our English language learners, and Special Needs students. Parents see report cards with A's and B's, and students become confident learners, on a college track. We approach learning in partnership with parents and provide training, coaching and materials for parents to use with their children during and after the tutoring period. Our small group tutoring approach creates a highly interactive environment where students encourage, motivate and support each other, and results in unusually high achievement levels. One-on-one tutoring is also available where necessary. Tutoring takes place at your student's school, libraries, community centers. Students meet two to three times a week over a period of 1 to 3 months. Sessions are usually 2 hours long. Healthy snacks are provided. Transportation is provided. Enrichment activities, and a summer program are offered. Our tutors are all college graduates, master degrees, and credentialed teachers. We believe that EVERY child is a GENIUS and our results prove us right!! We are a non profit and our bottom-line is YOUR CHILDREN. Call us toll free at 1-888-742-6249 for more information.

ESD 105

Districts: Yakima School District

PROGRAM DESCRIPTION

Yakima School District is accountable to their students. They are committed to providing an SES learning opportunity for each child to succeed. Teachers see the challenges many of our students face as opportunities and our tutors believe we will make a difference in ensuring every student can and will learn. Making available up to 30 extra hours of instructional time, learning is accelerated.

Accelerated math and reading tutoring prepares students for state assessments and meeting graduation requirements. Students needing additional support receive instruction aligned with Yakima School District programs and requirements. Since tutoring is provided by certified teachers there is fidelity to the use of research-based strategies and curricula. District teachers also have access to a wealth of embedded professional development. Daily schedules will be organized in collaboration between parents, students, and each teacher-tutor. Tutor-parent meetings will be focused on improving instruction through analyzing student data and student engagement and using student learning plans to set learning targets. Student test scores below grade level impact academic success and will be addressed. Academic language proficiency will be taught by tutors and monitored. Math and Reading instruction is offered for all K-12th grade students eligible for SES. Relationships with students and parents are also a strong and effective component of Yakima's SES program. Partnerships established among students, tutors, and parents provide a positive opportunity for our district to make a difference in the lives of our students. The YSD builds on assets of our schools, community, families, and students to strengthen a number of opportunities for our students. Students participate in tutoring with other students, learn to be mentors and role models for the younger students, and experience success in school. Tutor instruction is differentiated in Reading and Math, focused on the specific needs of students, and accelerating student achievement.

PROGRAM DESCRIPTION

This program is intended to help your children improve academic gap in Math Computation, Reading and Homework Skills. The program provides students face-to-face, one-to-one and small-group instruction with talented teachers and tutors. The program will provide individual lessons designed to meet the student's instructional level by well-qualified and dedicated educators.

The program is also intended to help low-income, refugee/immigrant and minorities in the community with language barriers. We will provide assistance to students with little or no English-speaking backgrounds with dedicated educators that can relate to the linguistic and cultural affiliations of their students and parents. By communicating with parents in languages that they understand, the program will help parents develop better understanding of their children's needs and follow through their children progress. We will assist students with language gap with homework to ensure that the students develop better homework skills and learn effective ways of finishing their homework.

The program will be held at local locations and learning centers for convenience of parents and students. The program objective is to improve grades by improving the students reading, math and study skills. Further, the program will specifically address behavior and attitude by teaching respect, discipline and self-esteem.

It is a rewarding program that focuses on positive accomplishments for students and their families.

ESD 105

Districts: Zillah School District, Granger School District, Toppenish School District

PROGRAM DESCRIPTION

The Zillah School District offers free tutoring services in Reading and Mathematics to eligible students. Eligible students are those who are from a school that has not met state targets for improving the achievement of all students. Supplemental Educational Services (SES) are available to eligible students if the student is (1) not meeting OSPI standards in reading and/or math and (2) are from low-income families.

The Zillah School District SES program is an instructional program aligned to Washington's Essential Academic Learning Requirements and uses research based instructional strategies in Reading and Mathematics to improve and strengthen individual student skills. Tutorial instruction will be by certified, state approved, highly qualified teachers and para educators in an after school program setting. Individualized tutoring sessions or small group instruction will be an extension of the school district's instructional program and will be utilized to increase student achievement.

A pre-assessment in reading and/or math along with the state standardized assessment data will allow highly qualified staff to diagnose student needs, identify skill or knowledge gaps, and tailor and customize an individualized instructional program to academically meet the needs of the student. A detailed, instructional plan will be developed that includes progress goal setting, parent partnering and outlined requirements for homework will be created defining the goals and objectives based on the needs of the student.

The district's SES program will work collaboratively with the student's school and district staff to allow the program to be an extension of the classrooms instructional program. SES teachers, building administrators, appropriate district staff and parents will be sent weekly progress reports that will reflect the students progress towards the goals set prior to beginning the program. These reports and any parent /guardian requested conferences will be available in Spanish at the parent/guardians request.
