

# BUTTERFINGERS!

## Rainforest!

What if I told you we would no longer have medication? With out medication you could die easily with a cut, flu, and cancer. I think we should save the rainforest because we get lots of things out of the rainforest .Rainforest animals are becoming extinct each year. Global warming is increasing each time a rainforest is cut down.

We get lots of things out of the rainforest, like candy. What would life be with out candy? I mean all sorts of candy, chocolate, bubble gum and much more. I mean candy! I know too much is not good but Bubble gum! We get to chew bubble gum in every class .Last year in 5th grade we got to chew bubble gum during the WASL! Why? Well for me bubble gum helps me concentrate. Chocolate is the best thing in the world! Even if chocolate is fattening it is still the best thing in the world.

We use a lot of chocolate like for cakes and all kinds of chocolate bars. We get medication out of rainforest. Without medication more people will die easily with something as small as a cut. The world will be over in a couple of years if we keep cutting down rainforest.

Animals! For those who love animals, animals are becoming extinct each year for many reasons but one main reason is that rainforest are being cut down and there is a lot of animals in the rainforest. Biological treasures are being recognized and as we are just beginning to appreciate their true value. Ewe! Dead animals become some of the things we use like makeup and lip gloss.

Global warming! Global warming increases every time a rainforest is cut down. Every time a rainforest is cut down no more carbon dioxide comes out

of it. That means too much carbon dioxide. If we have too much carbon dioxide in the air it traps every thing and gets very hot. Rainforest trees help stop this by using up carbon dioxide + giving off oxygen.

Rainforest should not be cut down for any reason even if we need wood because that's just making more animals die and people too because out of rainforest we get medication and sweets! Global warming is increasing each time too! So help us save the rainforest!

# Rainforest

Salvador Gonzalez

"Dude What if we had no chocolate, medicine, plastic, and fruits?" That would be a bad thing. I think we should save the rain forest. The rain forest gives us materials, animals need it, it and helps stop global warming.

People are dying because they don't have various medicines to save them. The rain forest provides us

*lyric? It is a rapper named Lil Wayne. The type of music that he sings is rap. He is the greatest rapper alive. He has many fans. He also has a big tour bus. He found drugs and a gun in a tour bus. His real name is Dwayne Michel Carter Jr.*

*Lil Wayne's assistant has told a court that he occasionally saw a handgun on the rapper's tour bus, and also testified that he saw people smoke marijuana on the bus. Terry Bourgeois appeared in a Manhattan court October 20, , that he did not see Lil Wayne holding the gun. He also said that he did not for his testi-*

these with medicine, along with fruits, chocolates, plastic and goods. Imagine all the helpful things we can continue to enjoy by saving the rain forest. In addition we need fruits to get our nutrients we need.

We can save the rain forests hunting the animals that would go extinct because they wouldn't have trees to live in and food to eat.

Would global warming would be better if we protect our rain forest because trees give us oxygen. If we cut the trees, down it would be worse than it is. So, I say, we should start to save the rain forest. Have

only some people to chop the fruit trees only some of them because if we all go, they will be a little of each thing and would be more expensive, like the chocolate it's \$.99 and if there were only a little chocolate in the world it would probably cost \$2.00, that is a lot of money for a piece of chocolate. The animals need the rain forest, and it helps stop the global warming.

So let's have way save the rain forest party.

Por la razón de que la selva es la casa de los animales y si no se salvan los animales no tendrán un lugar donde

# The Rainforest!

Ooh, eeh, aah, aah! How would the world live without monkeys? Those silly creatures that scratch their heads and go crazy for bananas! Well, that's what would happen if there were no rainforests. That is one reason why we should save rainforests. Besides, we get food and paper from those wonderful places.

If we didn't have rainforests to get trees to make paper from, where would we get it? Not to mention toilet paper, what would we do? No trees also mean that cities and towns couldn't have Newspapers. Newspapers are important in communities so they can spread news. Paper makes a lot of things.

Rainforests contain a lot of plants, and if you think about it, we need plants. We really do. Also, ani-

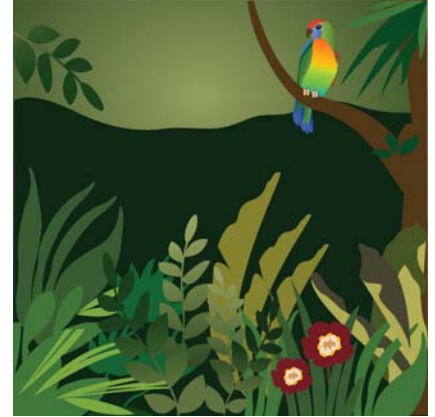

mals such as reptiles, amphibians, arthropods, birds, and insects have homes in rainforests. So please, think of the animals!

We get some good food from rainforests like chocolate; we would run out of chocolate. For an example, Chippy's Chocolate Chunk Candy Factory is running out of the cocoa beans used to make the chocolate because rainforests are decreasing. Coffee, beautiful caffeine, and last, gum all come from the rainforest! I, for one enjoy chewing gum and want that enjoyment to continue.

So, with all those reasons to save rainforests, how could you say no? Well, if you care about monkeys, like chocolate, and like to use toilet paper, you couldn't! If you agree, give

a call to your congressman today and ask him to help save the rainforest.

Kendra

## Interview with Mrs. Linehan!

If you're a trouble maker, and go to in-school suspension, wouldn't you want to know more about the lady that's going to be with you for 6-7 hours?

Timmie Linhan, loves her job as an online learning supervisor college, and career coordinator. Also for you trouble makers, she is also an in-house suspension supervisor because she gets to spend time with students and helps them learn. I had Mrs. Linehan in kindergarten for my P.E teacher. She was one of the best teachers I had when I was young. To bad she came over to the CMS/CHS.

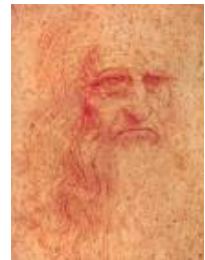

On her spare time she loves

to do lots of things. One thing is during the summer she loves to grow a veggie garden. She also loves to spend time with children. One thing she hates about kids is when their rude! One other thing she hates about boys is it does not take long to get ready for anything.

Something else about Timmie Linehan is that she has 4 kids of her own. If one law could never be broken she would chose murder. BOO! If her house were to be haunted by one person from history she would choose Leonardo DaVinci.

I chose to interview Mrs.Linehan because I wanted to

know more about how she felt about her job over here in the CMS/CHS, and other interesting things about her.

## Save the Rainforest?

*Why should we save the rainforest? Well the rainforest provide us with many items and food. The rainforest also has many beautiful plants and animals that live there. I hope this will make you save the rainforest.*

*Why should we save the rainforest? The rainforest provides us with many useful things like wood, which we need wood for many things like houses, desks and many more things. The rainforest also provides us with rubber for tire and rubber for many more things. Several of our foods sources come from the rainfor-*

*est. The rainforest provides us with plastic.*

*People should save rainforests for the special kinds of plants that live in the rainforest. People should stop driving cars around these fragile rainforest because the cars are making the air bad for plants.*

*Why save the trees that is in the rainforest? People should start saving trees because animal's homes are being destroyed. Without homes certain animals could become endangered. One-half of the rainforest is being destroyed every second with traffic consequences for both devel-*

*oping and counties plants.*

*I hope this persuasive essay convinces you to save the rainforest. The rainforest provides us with many items like wood and rubber. You can help by not driving cars around to prevent the bad air for the plants. People should save rainforest trees because animals live there. I hope this essay helps to stop destroying rainforests.*

## Fire House Dog!

Bark bark! Have you ever heard of the movie Firehouse Dog? It's a movie about a famous dog that gets lost and a boy (Josh Hutcherson) and his family find him and keep him as a firehouse dog. It is a very touching story.

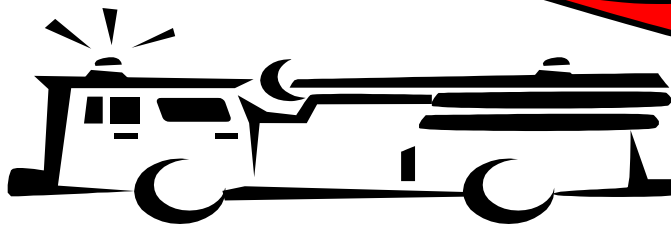

This movie is directed by Todd Holland. Other movies or TV show Todd has directed are My So Called Life, Malcolm in the Middle, and a lot more. *A lot*. This movie might be of interest to you if you like dogs, preferably if you like *firehouse* dogs.

The main characters are Shane Fahey (Josh Hutcherson), and Rexxx/Dewy (Dog). The setting The main characters are Shane Fahey (Josh Hutcherson), and Rexxx/Dewy (Dog). The setting is in **HOLLYWOOD**. In my opinion,

there aren't really any weak points in the movie. But the strong point in the movie is the ending. The ending is my *favorite* part where Rexxx/Dewy decides to stay with Shane.

This movie is one of my favorite movies. I would really advise anyone to watch it. It is a *Walt Disney* movie too. "Firehouse Dog" is a story with a half happy half sad ending. If I had to give it a letter grade, I would give it an A+.

# Super Pills

Do you want to be a cool person? If yes,  
You should get SUPER PILLS!!!!!!!

These pills are so amazing, it could change you into a whole different character.  
So if I were you, I would get super pills.

STEPS, follow carefully

1, eat the pill and drink water

2 Amount of time you want the pill to last.

3 chose the character you want to be.

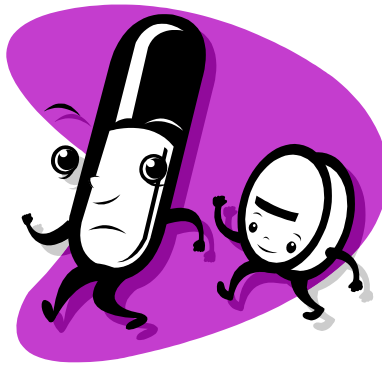

+

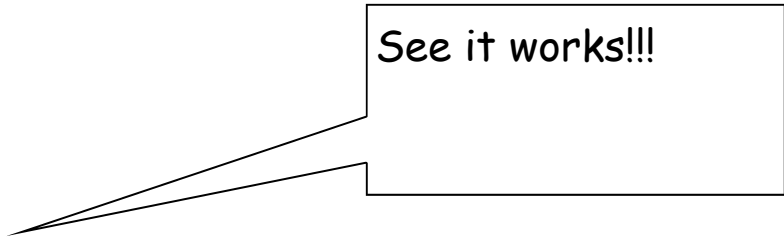

## Warning

Eat only one pill per day.
